

SWISS WATER DECAFFEINATED COFFEE INC. CONSOLIDATED FINANCIAL STATEMENTS

For the Year Ended December 31, 2021

Independent auditor's report

To the Shareholders of Swiss Water Decaffeinated Coffee Inc.

Our opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Swiss Water Decaffeinated Coffee Inc. and its subsidiaries (together, the Company) as at December 31, 2021 and 2020, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS).

What we have audited

The Company's consolidated financial statements comprise:

- the consolidated statements of financial position as at December 31, 2021 and 2020;
- the consolidated statements of income for the years then ended;
- the consolidated statements of comprehensive income for the years then ended;
- the consolidated statements of changes in equity for the years then ended;
- · the consolidated statements of cash flows for the years then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2021. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Application of hedge accounting for derivative financial instruments

Refer to note 3.13 – Summary of significant accounting policies - Financial instruments, note 8 – Derivative financial instruments - assets (liabilities), note 23.2 – Commodity price risk hedges and note 23.3 – Foreign currency risk hedges to the consolidated financial statements.

The Company uses derivative financial instruments and applies hedge accounting to manage and hedge commodity price risks and foreign currency risks.

The Company designates derivative financial instruments as hedging instruments and the change in fair value of designated coffee inventory and hedged firm commitments as hedged items in a fair value relationship to manage the risk of changes in benchmark commodity prices. As well, the Company designates derivative financial instruments as hedging instruments and the change in fair value of designated purchase commitments as hedged items in a fair value hedge relationship to manage the risk of changes in foreign exchange. At each period end, management calculates the effective portion of the changes in the fair value of the hedging instruments and hedged items, which are recorded in the consolidated statement of income and in inventory, and derivative assets/liabilities and hedged firm commitments. The Company's hedging instruments designated in a fair value relationship amounted to \$3.4 million (derivative assets of \$3.5 million and derivative liabilities of \$0.1 million) as at December 31, 2021.

How our audit addressed the key audit matter

Our approach to addressing the matter included the following procedures, among others:

- Obtained the Company's documented risk management objective and strategy for undertaking the hedge.
- Assessed the appropriateness of management's hedge documentation and eligibility of hedge designation.
- Tested the operating effectiveness of relevant internal controls related to management's hedge designations.
- Assessed the ongoing hedge effectiveness by evaluating if there are any changes in the economic relationships between the hedged item and hedging instrument.
- Evaluated management's assessment that the hedged forecasted sales revenue is highly probable by comparing to historical results.
- Tested the completeness, accuracy and existence of underlying hedging instruments and hedged items outstanding as at year-end used in management's calculations on a sample basis, which included confirming with third parties and inspecting the underlying contracts.
- With the assistance of professionals with specialized skill and knowledge:
 - recalculated measurements of hedge ineffectiveness as at December 31, 2021:

Key audit matter

The Company also designates derivative financial instruments as hedging instruments and designates highly probable forecasted sales revenue as hedged items in a cash flow hedge relationship to manage the foreign exchange risk associated with the cash flows of highly probable forecast transactions. The portion of the gains/losses on the hedging instruments determined to be effective are recorded in other comprehensive income and cash flow hedge reserve within equity until the hedged expected future cash flows affect profit or loss; at which time, the gains/losses are reclassified to the consolidated statement of income. The Company's hedging instruments designated in a cash flow hedge relationship amounted to \$1.1 million (assets of \$1.2 million and liabilities of \$0.1 million) as at December 31, 2021. The Company's cash flow hedge reserve recorded within equity amounted to \$1.1 million as at December 31, 2021.

We considered this a key audit matter due to the pervasive impact of hedge accounting on the Company's financial performance, the complexity and audit effort in performing audit procedures to assess the appropriateness of hedge accounting and the presentation of the related fair value adjustments. Professionals with specialized skills and knowledge assisted us in performing the procedures.

How our audit addressed the key audit matter

- recalculated the fair value adjustments from the change in fair value of the hedging instruments and hedged items as at December 31, 2021; and
- recalculated the gains/losses on the cash flow hedging instruments.
- Traced the hedge accounting adjustments to the related financial statement line items.
- Assessed the appropriateness of consolidated financial statement disclosures in relation to hedging instruments and hedged items designated in the hedge accounting relationship.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements,
 whether due to fraud or error, design and perform audit procedures responsive to those risks, and
 obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
 not detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of
 internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Robert Coard.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

1. NATURE OF BUSINESS AND LIQUIDITY RISK

Swiss Water Decaffeinated Coffee Inc., ("Swiss Water" or the "Company"), is an entity incorporated under the Canada Business Corporations Act ("CBCA"). The common shares of the Company are listed on the Toronto Stock Exchange under the symbol 'SWP'. The Company's head office is located at 7750 Beedie Way, Delta, British Columbia, V4G 0A5, Canada.

Swiss Water is primarily involved in the decaffeination of green coffee without the use of chemicals by employing the proprietary SWISS WATER® Process. The Company leverages science-based systems and quality controls to produce coffee that is 99.9% caffeine free.

Swiss Water owns all of the interests of Seaforth Supply Chain Solutions Inc. ("Seaforth"), which is incorporated under CBCA and operates in Delta, British Columbia, Canada; Swiss Water Decaffeinated Coffee Company USA, Inc. ("SWUS"), an entity registered in the Washington State, USA, and; Swiss Water Decaffeinated Coffee Europe SARL ("SWEU"), an entity registered in Bordeaux, France.

Seaforth provides a complete range of green coffee handling and storage services, while SWUS and SWEU act as marketing and sales companies and they do not have significant assets.

The Company has a revolving credit facility agreement (note 11.3) for up to \$30.0 million. As of December 31, 2021 amounts drawn on the credit facility total \$23.4 million and are classified as a part of current liabilities in the consolidated statement of financial position as the Credit Facility matures on October 18, 2022. The Credit Facility can be extended, subject to lenders' approval. There is a risk that the Company may not be able to extend or renew the Credit Facility or renew on the same credit terms at the time of maturity.

2. BASIS OF PREPARATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). IFRS comprises IFRSs, International Accounting Standards ("IAS"), and interpretations issued by the IFRS Interpretations Committee ("IFRIC") and the former Standing Interpretations Committee ("SIC").

These consolidated financial statements for the year ended December 31, 2021 were approved for issuance by the Company's Directors on March 29, 2022. There were no significant non-adjusting events that occurred between the reporting date and the date of authorization, except as disclosed in Note 25.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies used in the preparation of these consolidated financial statements are as follows:

3.1 Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period. Historical cost is based on the fair value of the consideration given in exchange for assets.

3.2 Currency of presentation

These consolidated financial statements are presented in Canadian dollars. Except for per share amounts, all amounts are expressed in thousands of Canadian dollars, unless otherwise stated. References to US\$ are to United States dollars.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

3.3 Basis of consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries, all of which are wholly owned. Subsidiaries are all entities over which the Company has the power to control the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable, or convertible, are considered when assessing whether the Company controls another entity. All intercompany transactions, balances, income and expenses are eliminated on consolidation.

3.4 New and amended standards adopted by the Company

The following amendments to accounting standards became effective for annual periods beginning on or after January 1, 2021. The adoption of these revised standards by the Company did not have a material impact on its consolidated financial statements.

- IAS 1 amendments address the classification of liabilities between current and non-current;
- IFRS 9/ IAS 39 and IFRS 7 (phase 2) were amended to address issues arising from the implementation of interest rate benchmark reform ("IBOR"), including the replacement of one benchmark with an alternative one. The Company has not currently transitioned its agreements to address IBOR reform. Currently, the Credit Facility, under the Borrowings note, is exposed to LBOR which is currently scheduled to cease publication in the near future. We will continue to monitor developments on alternative benchmark interest rates and we expect to transition to alternative rates as widespread market practice is established. We do not expect the replacement to result in a significant change to our risk management strategy.

3.5 Changes in accounting standards not yet effective

These standards are effective for periods beginning after January 1, 2022 and the Company does not anticipate a material impact on its financial statements:

- IFRS 9 was amended to address which fees should be included in the 10% test for derecognition
 of financial liability.
- IAS 37 was amended to clarify (i) the meaning of "costs to fulfil a contract", and (ii) that, before
 a separate provision for an onerous contract is established, an entity recognizes any impairment
 loss that has occurred on assets used in fulfilling the contract, rather than on assets dedicated
 to that contract.
- IAS 16 was amended to (i) prohibit an entity from deducting from the cost of an item of PP&E any proceeds received from selling items produced while the entity is preparing the asset for its intended use (for example, the proceeds from selling samples produced when testing a machine to see if it is functioning properly), (ii) clarify that an entity is "testing whether the asset is functioning properly" when it assesses the technical and physical performance of the asset, and (iii) require certain related disclosures.
- IAS 12 was amended to require companies to recognize deferred tax on transactions that, on
 initial recognition, give rise to equal amounts of taxable and deductible temporary differences.
 Consequential amendment to IFRS 1 to add an exception to retrospective application, effective
 January 1, 2023.
- IAS 8 amended the definition of accounting estimates, effective January 1, 2023.
- IFRS 16 encompasses property, plant and equipment: proceeds before intended use.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

3.6 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision makers, the Chief Executive Officer and the Chief Financial Officer. A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment reflects the provision of products or services within a particular economic environment that is subject to risks and returns that are different from those of other economic environments. The Company's sales are primarily generated in a single business segment of decaffeination of green coffee beans. The chief operating decision makers examine the Company's performance and operating activities of the single business segment from a reported geographic perspective.

3.7 Foreign currency translation

Functional and presentation currency

Items included in the consolidated financial statements of each of the Company's subsidiaries are measured using the currency of the primary economic environment in which each entity operates ("the functional currency"). The functional and presentation currency of Swiss Water is the Canadian dollar. The functional currencies of the USA and the European subsidiaries are the United States dollar and the Euro, respectively.

Foreign currency transactions

Foreign currency transactions and balances are translated as follows: (i) monetary assets and liabilities denominated in foreign currencies are translated to Canadian dollars at the exchange rate prevailing at the reporting date; (ii) non-monetary items which are measured using historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; (iii) non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined; and (iv) foreign currency transactions are translated into functional currency of the entity at the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses are recognized in net income and presented in the Consolidated Statement of Income in accordance with the nature of the transactions to which the foreign currency gains and losses relate, in the period in which they occur.

Foreign operations

Foreign operations are translated from their functional currencies into Canadian dollars on consolidation as follows: (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of the statement of financial position; (ii) income and expenses for each statement of loss are translated at a quarterly average exchange rate (unless this rate is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); (iii) share capital for each statement of financial position presented are translated at historical rate; and (iv) all resulting exchange differences are recognized in other comprehensive income as cumulative translation adjustments. Exchange differences that arise relating to long-term intercompany balances that form part of the net investment in a foreign operation are also recognized in this separate component of equity through other comprehensive income.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

3.8 Cash and cash equivalents

Cash and cash equivalents include cash on hand, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the statement of financial position.

3.9 Inventories

Raw materials are stated at the lower of cost, determined on a specific identification basis, and net realizable value, being the estimated selling price of finished goods less the estimated cost of completion of the finished goods.

Finished goods are stated at the lower of cost and net realizable value. Cost of finished goods includes all expenses directly attributable to the manufacturing process like direct labour and direct materials, as well as suitable portions of related fixed and variable production overheads, based on normal operating capacity. Costs of ordinarily interchangeable items are assigned on a first-in-first-out basis. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

3.10 Property, plant and equipment

The Company leases facilities that house its production facility, offices and warehouse facilities. Property, plant and equipment are carried at acquisition cost or manufacturing cost less depreciation and impairment losses. Historical cost includes expenditures that are directly attributable to the acquisition of the items, costs related to interest on the lease liability and depreciation of right of use assets relating to leased properties. Cost may also include asset retirement obligation and transfers from the equity of any gains or losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment. Subsequent costs are recognized in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance expenditures are recognized in the statement of income during the financial period in which they are incurred.

Borrowing costs directly attributed to the construction of any qualifying asset, are capitalized during the period of time that is required to complete and prepare the asset for its intended use.

Major renovations are depreciated over the remaining useful life of the related asset or to the date of the next major renovation, whichever is sooner.

The costs related to the property, plant and equipment in the course of construction are classified as construction-in-progress. Such items are transferred to the appropriate category of property, plant and equipment when they are completed and ready for use as intended. Depreciation of these assets commences when the asset is available for use.

Depreciation is recognized on a straight-line basis to allocate the cost or valuation of each asset to its residual value over its estimated useful life commencing when the asset is ready for its intended use. The estimated useful lives of property, plant and equipment are as follows:

Buildings Right of use assets to the expiry of the lease renewal option or lease term to the expiry of the lease renewal option or lease term

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Leasehold improvements to the expiry of the lease renewal option or lease term

Production machinery and equipment 5 to 35 years

Warehouse and office equipment 10 years
Computer hardware and software 5 years
Furniture and fixtures 5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposals are determined by comparing proceeds with carrying amounts. These are included in profit or loss.

For additional policies related to Right-of-use assets, refer to 'Lease liabilities and right of use assets'.

3.11 Intangible assets

Proprietary process technology ("PPT")

PPT represents intangible assets of Swiss Water with a finite life and is carried at cost less accumulated amortization. Amortization is recognized on a straight-line basis to allocate the cost of PPT to its residual value over its estimated useful life of 14 years.

Brand

Swiss Water's brand has a finite useful life and is carried at cost less accumulated amortization. Amortization is recognized on a straight-line basis over its estimated useful life of 14 years.

3.12 Impairment of assets

Property, plant and equipment, and intangible assets with finite lives, that are subject to depreciation or amortization, are tested for impairment indicators at the end of each reporting period. If any such indicator exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss.

An impairment loss is recognized for the amount by which the carrying amount of an asset or cash generating unit ("CGU") exceeds its recoverable amount. The Company has determined that it has only one CGU and that all assets relate to that CGU. To determine the recoverable amount, management estimates either the fair value less costs to sell, or the value-in-use based on the present value of expected future cash flows from the CGU. In estimating the value-in-use, management must determine the appropriate discount rate in order to calculate the present value of those cash flows, as well as make certain assumptions about future profits which relate to future events and circumstances. Discount factors are determined individually for each asset, or CGU, and reflect their respective risk profiles as assessed by management. In the year 2020 the Company identified an impairment indicator for one of the production lines in the Burnaby location due to the lease at that location not being renewed past June 2023. As such, the Company tested property, plant and equipment for impairment in accordance with IAS 36, Impairment of Assets, using a fair value less cost to sell method and determined that no write-down of property, plant and equipment was required. No impairment indicators were noted in the year 2021.

3.13 Financial instruments

IFRS 9 requires the classification and measurement of financial assets and for all recognized financial assets to be measured at amortized cost or fair value in subsequent accounting periods following initial

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

recognition. IFRS 9 also outlines the treatment of hedge accounting and introduces a single, forward-looking expected credit loss impairment model.

All financial assets, other than accounts receivable, are included in the measurement category of fair value through profit and loss. There was no change to the measurement category for financial liabilities at amortized cost.

Classification

The Company classifies its financial assets and financial liabilities in the following measurement categories:

- a) those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss) and
- b) those to be measured at amortized cost.

The classification of financial assets depends on the business model for managing the financial assets and the contractual terms of the cash flows. Financial liabilities are classified as those to be measured at amortized cost unless they are designated as those to be measured subsequently at fair value through profit or loss ("FVPL") (irrevocable election at the time of recognition).

For assets and liabilities measured at fair value, gains and losses are either recorded in profit or loss or other comprehensive income. The Company reclassifies financial assets when and only when its business model for managing those assets changes. Financial liabilities are not reclassified.

The Company has implemented the following classifications for financial instruments, other than derivatives:

- a) Cash and cash equivalents and short-term investments are classified as assets at fair value and any period change in fair value is recorded through interest income in the consolidated statement of income, as applicable.
- b) Accounts receivable and other receivables are recognized initially at fair value and subsequently are classified as assets at amortized cost using the effective interest rate method, less loss allowance. Interest income is recorded in the consolidated statement of income, as applicable.
- c) Accounts payable, credit facilities, the debt portion of the convertible debenture, debt portion of debenture with warrants, the construction loans, borrowings and other liabilities are classified as other financial liabilities and are measured at amortized cost using the effective interest rate method. Interest expense is recorded in the consolidated statement of income, as applicable.

With the adoption of hedge accounting, "gains/losses on risk management activities" reflects the change in fair value of undesignated revenue hedges and gains or losses on designated hedging instruments that are not otherwise recorded in the income statement with the hedged item (revenue or cost of sales).

Also, with the adoption of hedge accounting, "gains/losses on fair value on embedded option" are gains or losses on the embedded derivative in the convertible debenture debt instrument.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months, and it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Recognition and de-recognition

Financial assets and financial liabilities, including derivatives, are recognized on the consolidated statement of financial position when the Company becomes a party to the financial instrument or derivative contract. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the Company measures a financial asset at its fair value, plus, in the case of a financial asset or liability not at FVPL, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. Transaction costs of financial assets and financial liabilities carried at FVPL are expensed in profit and loss. Financial assets and financial liabilities with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

- a) Amortized cost: Assets that are held for the collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of profit or loss.
- b) FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through other comprehensive income ("OCI"), except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as a separate line item in the statement of profit or loss.
- c) FVPL: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognized in profit or loss and presented net within other gains/(losses) in the period in which it arises.

Impairment

The Company assesses all information available, including on a forward-looking basis, the expected credit losses associated with its assets carried at amortized cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk. The Company's only financial asset at amortized cost are accounts receivable and other receivables, for these the Company

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

applies the simplified approach as permitted by IFRS 9 which requires expected lifetime credit losses to be recognized from the initial recognition of the receivables.

Derivatives and Hedging Activities

Recognition and measurement

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged, and the type of hedge relationship designated. The Company designates certain derivatives as either:

- a) hedges of the fair value of recognized assets or liabilities or a firm commitment (fair value hedges),
- b) hedges of a particular risk associated with the cash flows of recognized assets and liabilities and highly probable forecast transactions (cash flow hedges), or
- c) hedges of a net investment in a foreign operation (net investment hedges).

The Company documents at the inception of the hedging transaction the economic relationship between hedging instruments and hedged items including whether the hedging instrument is expected to offset changes in cash flows of hedged items. The Company documents its risk management objective and strategy for undertaking various hedge transactions at the inception of each hedging relationship.

Cash flow hedges that qualify for hedge accounting

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in the cash flow hedge reserve within equity until the hedged expected future cash flows affect profit or loss; at which time, the gains/losses are reclassified to the consolidated statement of income. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss. When option contracts are used to hedge forecast transactions, the group designates only the intrinsic value of the options as the hedging instrument.

Gains or losses relating to the effective portion of the change in the intrinsic value of the options are recognized in the cash flow hedge reserve within equity. The changes in the time value of the options, that relate to the hedged item ('aligned time value'), are recognized within other comprehensive income in the costs of hedging reserve within equity.

Commodity and Currency risk hedges

The Company applied hedge accounting to economic hedges entered into in accordance with its Foreign Exchange Risk Management Policy (FX Policy) and the Commodity Price Risk Management Policy (Commodity Policy). Economically, the specific hedging activities carried out under these policies by the Company are as follows.

The Company designates derivative financial instruments as hedging instruments and the change in fair value of designated coffee inventory and hedged firm commitments as hedged items in a fair value relationship to manage the risk of changes in benchmark commodity prices, as described under 'Commodity price risk hedges'.

The Company designates derivative financial instruments as hedging instruments and designates highly probable forecasted sales revenue as hedged items in a cash flow hedge relationship to manage the

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

foreign exchange risk associated with the cash flows of highly probable forecast transactions, as described under 'Currency risk hedges related to US\$ denominated future process revenue'.

As well, the Company also designates derivative financial instruments as hedging instruments and the change in fair value of designated purchase commitments as hedged items in a fair value hedge relationship to manage the risk of changes in foreign exchange, as described under 'Currency risk hedges related to US\$ denominated purchases', below.

a) Commodity price risk hedges

Commodity price risk hedges relate to purchase commitments and inventory ("commodity hedges"). When the Company enters into a purchase commitment to purchase green coffee and fixes the New York 'C' ("NY'C") price component (which it will later sell at a to-be-determined price based on the NY'C'), the Company enters into an offsetting short position on the Intercontinental Exchange. The Company monitors, on a macro basis, the amount of purchase commitments and amount of inventory on hand for which the ultimate sale price is variable and has not yet been fixed based on the NY'C' and compares this to the amount of coffee covered by future net short positions to determine whether the net short position requires adjustment.

At each period end, commodity hedges are remeasured to their fair value. Under hedge accounting, the effective portion of the gains (losses) for price fixed hedged coffee contracts and coffee inventory will be held on the consolidated statement of financial position until inventory for such contracts is received and subsequently sold, at which time the gains (losses) will flow to cost of sales on the consolidated statement of income.

b) Currency risk hedges

Currency risk hedges related to US\$ denominated future process revenue:

The Company enters into forward contracts to sell US\$ at future dates to hedge the foreign exchange cash flow variability of expected US\$ from processing fee revenue. The hedged processing revenue includes both processing fee revenue from tolling arrangements (processing of customer owned coffee) as well as the US\$ processing fee layer of inventory sales agreements.

At each period end, currency risk hedges on US\$ future revenues are remeasured to their fair value. Under hedge accounting, unrealized gains (losses) for US\$ forward contracts are reclassified so that the impact on the consolidated statement of income is deferred through other comprehensive income, until the hedge instrument matures, at which time the realized gain (loss) is reflected in revenue on the consolidated statement of income.

<u>Currency risk hedges related to US\$ denominated purchases:</u>

The Company enters into forward contracts to buy US dollars (US\$) for significant purchase commitments denominated in US\$. Purchase commitments denominated in US\$ include procurements of equipment for Company use and purchases of green coffee inventory which, once decaffeinated, is sold at a fixed Canadian dollar (C\$) price. To mitigate the exposure to changing margin on these transactions arising from fluctuations in the US\$/C\$ exchange rate, the Company enters into US\$ forward purchase contracts which economically lock in the US\$/C\$ exchange rate and effectively locks in the C\$ cost of equipment or inventory (inventory which is to be sold at the fixed C\$ amount).

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

At each period end, currency risk hedges on US\$ denominated purchases are remeasured to their fair value and:

- a) under hedge accounting, the effective portion of the gains (losses) will be held on the consolidated statement of financial position until the inventory is received and subsequently sold, at which time the gains (losses) will flow to the cost of sales on the consolidated statement of income, as well as
- b) under hedge accounting, the effective portion of the gains (losses) will be held on the consolidated statement of financial position until the equipment is received at which time the gains (losses) will flow to the property plant and equipment on the consolidated statement of financial position.

On all hedges entered into, if the hedge ratio for risk management purposes is no longer optimal but the risk management objective remains unchanged and the hedge continues to qualify for hedge accounting, the hedge relationship will be rebalanced by adjusting either the volume of the hedged instrument or the volume of the hedged item so that the hedge ratio aligns with the ratio used for risk management purposes. Any hedge ineffectiveness is calculated and accounted for in profit or loss at the time of the hedge relationship rebalancing.

Fair Value Hierarchy

The Company classifies and discloses the fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- a) Level 1 valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- b) Level 2 valuation techniques based on inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- c) Level 3 valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. The Company classifies a financial instrument to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

3.14 Lease liabilities and right of use assets

Adoption of IFRS 16 Leases

IFRS 16 introduces a single, on-balance sheet accounting model for lessees that is similar to the former finance lease accounting, with limited exceptions for short-term leases or leases of low-value assets. Lessees recognize a right-of-use asset representing its rights to use the underlying asset and a lease liability representing its obligation to make lease payments. IFRS 16 replaces existing leases guidance, including IAS 17, Leases, IFRIC 4: Determining whether an Arrangement contains a Lease, SIC-15: Operating Leases – Incentives and SIC-27: Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

Management judgement and estimates over leases

The preparation of consolidated financial statements requires that the Company's management makes assumptions and estimates on the classification of leases. When assessing the classification of a lease

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

agreement, certain estimates and assumptions need to be made and applied, which include, but are not limited to, the determination of the expected lease term and minimum lease payments, implicit borrowing rate, the assessment of the likelihood of exercising options, and estimation of the fair value of the leased property at lease inception.

Lease policy

At the inception of a lease contract, the Company assesses whether the contract is or contains a lease. A contract is, or contains, a lease if the contract conveys that right of control of the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset; (ii) the Company has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period, and; (iii) the Company has the right to direct the use of the asset. The Company has determined that contracts for its offices, warehouses, and select equipment contain a lease.

At inception or on a reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company presents right-of-use assets in 'Property, plant and equipment' and related liabilities in 'Lease liabilities'.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term plus expected renewal options which are available to the Company. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is reduced by impairment losses, if any identified, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, and if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise of: (i) fixed payments; (ii) variable lease payments that depend on an index rate, initially measured using the index as at the commencement date; (iii) amounts expected to be payable under a residual value guarantee, and : (iv) the exercise price under purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes these lease payments as an expense on a straight-line basis over the lease term.

The Company recognizes a depreciation charge for right-of-use assets and interest expense on lease liabilities in the consolidated income statement.

On the statement of cash flows, the Company includes repayments of the principal portion of the lease liabilities under financing activities whereas before the implementation of IFRS 16 they were included in cash flows from operations. The interest portion of the lease continues to be classified within cash flows from operating activities. Lease payments for short-term leases, lease payments for leases of low-value assets that are not included in the measurement of the lease liability are classified as cash flows from operating activities.

3.15 Current and deferred income taxes

Income tax expense or credit comprises current and deferred tax. Income tax expense is recognized in the statement of income and comprehensive income except to the extent that it relates to items recognized either in other comprehensive income or directly in equity. The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date, and any adjustments to taxes payable in respect of previous years. The Company periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax arises from the initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable income or loss, it is not accounted for. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the reporting date and are expected to apply when the related asset is realized, or the liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable income will be available against which temporary differences and non-capital loss carry forwards can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

3.16 Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that it will lead to an outflow of economic resources from the Company and amounts can be estimated reliably, although timing or amount of the outflow may still be uncertain.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date, including the risks and uncertainties associated with the present obligation. The discount rate used to determine the present value reflects current market assessments of the time value of money and the increases specific to the liability.

Any reimbursement that the Company can be virtually certain to collect from a third party with respect to the obligation is recognized as a separate asset. However, this asset may not exceed the amount of the related provision.

All provisions are reviewed at the end of each reporting period and adjusted or reversed to reflect management's current best estimate of the expenditure required to settle the present obligation at the end of the reporting period. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed. Provisions are reduced by actual expenditures for which the provision was originally recognized.

Where discounting has been used, the carrying amount of a provision is accreted during the period to reflect the passage of time.

3.17 Revenue recognition

IFRS 15 requires revenue recognition to follow a five-step model of identifying contracts, separating performance obligations, determining and allocating the transaction price, and recognizing the revenue as each performance obligation is satisfied.

The Company's primary sources of revenue are proceeds from sales of Swiss Water's decaffeinated coffee and from services provided to decaffeinate customers' owned coffee.

Swiss Water's revenue is measured based on consideration agreed on in contracts with customers and is recognized when the Company transfers control over products and services to the customer either at a point in time or over time.

For all revenue contracts, no significant judgements are made with respect to evaluating the timing of satisfaction of performance obligations, transaction prices, and amounts allocated to performance obligations. Consideration amounts are not variable. Payment terms are typically between 30 and 60 days, apart from select customers where payment terms are extended. For contracts with extended payment terms, the Company charges customers an insignificant financing component. Warranty, returns or refunds do not apply to the Company.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Revenue is disaggregated based on the customer's geographic region as described in the segmented reporting accounting policy. Also, the revenue, from contracts with customers, is disaggregated by major products and services: decaffeinated coffee sales, decaffeination services, and distribution.

Decaffeinated coffee sales

Decaffeinated coffee sales are the amounts that are charged to customers for the sale of decaffeinated coffee. The performance obligation is satisfied at a point in time when a customer obtains control of the product, which is when decaffeinated coffee is picked-up by or delivered to the customer.

Decaffeination services

Decaffeination services represent the amount charged to customers for the service to decaffeinate customer-owned coffee. The performance obligation is to provide the service, which is satisfied over time.

Distribution

Distribution revenue consists of shipping, handling and warehousing charges billed to customers. The performance obligation is satisfied over time as services are provided, which is at the same time as these services are consumed.

3.18 Employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related services are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations on the statement of financial position.

The Company provides benefits to employees through a registered retirement savings plan ("RRSP"). The Company contributes a percentage of earnings into an RRSP administered by an independent entity. Ultimately, each employee manages his or her own RRSP within the scope of the plan provided by the third-party administrator. The RRSP has no assurance of defined benefits to employees, and as such the Company has no legal or constructive obligations to make further contributions.

The Company also pays contributions to government pension insurance plans. The contributions are recognized as employee benefit expenses when they are due.

3.19 Share-based compensation

The Company has a restricted share unit ("RSU") plan for certain officers and employees and a deferred share unit ("DSU") plan for non-employee directors (collectively, "participants").

The RSUs granted are compound financial instruments as they are expected to be settled using a combination of cash and equity.

The equity-settled share-based compensation is measured at the fair value of the Company's common shares as at the grant date using a volume weighted average share price in accordance with the terms of the RSU plan. The fair value determined at the grant date is charged to income on a straight-line basis over the vesting period, based on the estimate of the number of RSUs that will eventually vest and be converted to common shares, with a corresponding increase in equity (share-based compensation reserve). As necessary, the Company revises its estimate if subsequent information indicates that the number of RSUs expected to vest differs from previous estimates. On the vesting date, the Company

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

revises the estimate to equal the number of equity instruments that ultimately vested. The impact of the revision of estimates, if any, is recognized in income or expense such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share-based compensation reserve.

For cash-settled share-based compensation, a long-term liability is recognized, measured initially at the fair value of the long-term liability using a volume weighted average share price. The amount of the liability is charged to income on a straight-line basis over the vesting period, based on the estimate of the number of RSUs that will eventually vest and be settled in cash. As necessary, the Company revises its estimate if subsequent information indicates that the number of RSUs expected to vest differs from previous estimates. On the vesting date, the Company revises the estimate to equal to the number of RSUs that ultimately vested and are settled in cash. The impact of the revision of estimates, if any, is recognized in income or expenses such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the long-term liability or current liability depends on the timing when the liability becomes due. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured using a volume weighted average share price, with any change in fair value recognized in income or expense for the year.

DSUs are issued to participants who elect to defer a portion of their current compensation in exchange for DSUs. DSUs are classified as cash-settled share-based payment transactions as participants receive cash following a redemption. The DSUs do not contain any vesting conditions or forfeiture provisions, as they are issued in exchange for deferred compensation. The Company recognizes the expense and the liability to pay for the eventual redemption when the DSUs are issued. Thereafter, the Company remeasures the liability at the end of each reporting date and the date of settlement, with the difference recognized in income or expense for the period. The fair value of DSUs is determined in accordance with the DSU Plan, which uses the average closing price for Swiss Water shares for the five trading days immediately preceding the relevant date.

3.20 Warrants

The Company issues warrants subject to shareholders, regulatory body and creditor approvals. Each warrant allows the holder to obtain one share of Swiss Water in exchange for cash at a price per share determined at the time the warrants are issued. Each warrant can be exercised at any time and not later than the exercise date of the warrant. The initial fair value of the warrants is measured at the grant date using the Black-Scholes option-pricing model and is recognized as a component of equity. When the warrant holder holds a warrant where a fixed amount of shares are issued for a fixed amount of cash, the fair value of the warrants in the statement of equity is not remeasured at each period end. If the holder of warrants decides to exercise the warrants, the fair value of the warrants will be de-recognized from warrants reserve component of the equity and recognised as a part of share capital. No adjustment is made for warrants that expire. As at each period end warrants are tested for potential dilution effect when calculating basic and diluted earnings per share.

3.21 Earning per share ("EPS")

The Company presents basic and diluted EPS for its common shares. Basic EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding during the year. Diluted EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding, adjusted for the effects of all dilutive potential common shares.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

4. MANAGEMENT JUDGMENTS AND ESTIMATION UNCERTAINTY

Judgment is used by management in selecting accounting policies, the determination of functional currency, the identification of cash generating units ("CGUs"), and the identification of revenue streams. In addition, judgment is often required in applying accounting policies, and in respect of items where the choice of a specific policy, accounting estimate or assumption to be followed could materially affect the reported results or net asset position of the Company should it later be determined that a different choice would be more appropriate.

Management considers the accounting estimates and assumptions discussed below to be its critical accounting estimates and accordingly, provides an explanation of each below. Actual results could differ from those estimates and assumptions.

4.1 Useful lives of depreciable assets

Management reviews the useful lives of depreciable assets at each reporting date. As at December 31, 2021 management determined that the useful lives represent the expected utility of the assets to the Company. For some equipment, the useful life could exceed the number of years of the life of the related building and lease as equipment life is based on the expected utility of those specific assets.

4.2 Provision for asset retirement obligations

Analysis and estimates are performed by the Company in order to determine the amount of restoration costs to be recognized as a provision in the Company's consolidated financial statements. The estimates consider the contract language in the lease, the expected useful lives of the Company's equipment, inflation rates, discount rates, and the expected costs that would be paid to a third party to remove property and equipment.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When the final determination of such obligation amounts differs from the recognized provisions, the Company's financial statements will be impacted.

4.3 Income taxes

The Company computes income taxes using the liability method, under which deferred income taxes are provided for the temporary differences between the financial reporting bases and the tax bases of the Company's assets and liabilities. Deferred tax assets and liabilities are measured using the enacted and substantively enacted income tax rates that are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

Deferred tax assets also reflect estimates of the recoverability of non-capital loss carry forwards. The Company has recognized the benefit of loss carry forwards to the extent that it is probable that taxable income will be available in the future against which the non-capital loss carry forwards can be utilized.

The financial reporting bases of the Company's assets reflect the useful lives of depreciable assets, as well as the carrying amounts of assets with indefinite useful lives. Accordingly, management estimates that impact the carrying amounts of depreciable and non-depreciable assets also have an impact on deferred income tax assets and liabilities.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

4.4 Leases and right of use assets

The preparation of consolidated financial statements requires that the Company's management makes assumptions and estimates on the classification of operating and finance leases. When assessing the classification of a lease agreement, certain estimates and assumptions need to be made and applied, which include, but are not limited to, the determination of the expected lease term and minimum lease payments, the discount rate/implicit borrowing rate, the assessment of the likelihood of exercising options, and estimation of the fair value of the leased property at lease inception.

4.5 Debenture with Warrants

At initial recognition, in the calculation of the fair value of the liability portion of the debenture with warrants, management estimates the interest rate on a similar instrument of comparable credit status providing for substantially the same cash flows, on the same terms, but without the warrants exercise option.

4.6 Convertible Debenture

Management estimates the interest rate on a similar instrument of comparable credit status and providing for substantially the same cash flows, on the same terms, but without the equity conversion option in the calculation of the fair value of the liability portion of the convertible debenture upon initial recognition. Management also estimates the fair values of the derivative liability related to the convertible debenture at initial recognition and at the end of each reporting period using the Black-Scholes option pricing model which requires management estimates.

5. CAPITAL MANAGEMENT

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain the future development of the business. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company considers its capital structure to include shareholders' equity and indebtedness. In order to maintain or adjust the capital structure, the Company may from time-to-time issue common shares, issue additional debt, adjust its capital spending, modify its dividend policy, and/or dispose of certain assets to manage current and projected debt levels.

The Company manages its capital in order to meet its growth objectives and payments of quarterly dividends to its shareholders. The dividend policy of Swiss Water is subject to the discretion of the Board of Directors, which reviews the level of dividends periodically on the basis of a number of factors including Swiss Water's financial performance, future prospects, and the capital requirements of the business.

6. ACCOUNTS RECEIVABLE

Accounts receivable are amounts due from customers for goods sold or services performed in the ordinary course of business. Information about the Company's exposure to foreign currency risk, interest rate risk and credit risk can be found in 'Financial risk management' note. The Company monitors lifetime expected credit losses using the simplified approach which is determined based on historic and adjusted relevant forward-looking information. The Company's customers have a negligible default rate and the Company's experience both in frequency and amount of losses are trivial. As a result, the expected credit losses provision as at December 31, 2021 and December 31, 2020 are de minimis.

Notes to the Consolidated Financial Statements

For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

7. INVENTORIES

During the year ended December 31, 2021, the cost of inventories recognized in cost of sales was \$102.4 million (2020: \$76.1 million). The hedge accounting component represents the derivative adjustment related to designated hedges for inventory on hand as at each period. As at December 31, 2021, the inventory provision was \$0.08 million (2020: \$0.09 million).

	December 31, 2021	December 31, 2020
Raw materials	\$ 13,607	\$ 6,436
Finished goods	17,238	10,442
Carbon	365	501
Packaging	292	159
Hedge accounting component	3,806	1,122
	\$ 35,308	\$ 18,660

8. DERIVATIVE FINANCIAL INSTRUMENTS

The Company's derivative financial instruments are carried at fair value through profit or loss as follows:

	De	cember 31, 2021	December 31, 2020
Coffee futures contracts, net	\$	3,458	\$ 505
US Dollar forward contracts, current		187	(52)
US Dollar forward contracts, long-term		-	-
Convertible debenture		-	(352)
	\$	3,645	\$ 101

The Company's derivative financial instruments are carried at fair value through other comprehensive income as follows:

	December 31, 2021	December 31, 2020
US Dollar forward contracts, current	\$ 505	\$ (10)
US Dollar forward contracts, long-term	623	967
	\$ 1,128	\$ 957

9. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment comprise owned and leased right-of-use assets.

	Dece	mber 31, 2021	Dece	mber 31, 2020
Property, plant and equipment	\$	87,036	\$	76,295
Right-of-use assets		19,618		21,829
	\$	106,654	\$	98,124

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

9.1 Property, plant and equipment

During the year ended December 31, 2021, depreciation expense of \$3.5 million (2020: \$2.5 million) was charged to cost of sales and \$0.2 million (2020: \$0.2 million) was included in administrative expenses.

In 2021, the Company recognized in leasehold improvements \$0.5 million of asset retirement obligations related to the Delta facility (2020: \$0.1 million).

As at December 31, 2021 and 2020, the majority of the construction in progress are costs related to the construction of the second production line at the Delta location. In 2021, the Company included in construction in progress \$0.1 million of interest expense on construction loans, while in 2020 the Company included in construction in progress \$0.6 million of interest expense, \$0.5 million of depreciation expense for right-of-use of assets and \$0.4 million of financing costs related to lease liabilities.

In 2020, Swiss Water commenced producing decaffeinated coffee at the new Delta manufacturing facility. As such, the Company transferred \$64.2 million of costs from construction in progress to building, leasehold improvements and production machinery. Management determined that the estimated useful lives for the first production line machinery, buildings, leasehold improvements, equipment and furniture ranges between 5 and 35 years.

In 2020, the Company received notification from the landlord of the Delta lease that they will not renew the lease after 2023. The location houses two production lines, of which, one line is anticipated to have utility past the year 2023, and therefore is depreciated beyond the life of the lease. The Company continues to pursue options to utilize this production line in future operations. As a result, as at December 31, 2020, the Company tested the property, plant and equipment for impairment in accordance with IAS 36, Impairment of Assets, using a fair value less cost to sell method and determined that no write-down of property, plant and equipment was required. No impairment indicators were noted for the year ended December 31 2021.

10. INTANGIBLE ASSETS

For the year ended December 31, 2021, amortization expense of \$0.2 million (2020: \$0.2 million) relating to proprietary process technology ("PPT") has been charged to cost of sales and \$0.02 million (2020: \$0.02 million) relating to brand was included in administrative expenses. There was no impairment loss recognized for the years ended December 31, 2021 and 2020.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

11.1 Construction loans with BDC and FCC

As of December 31, 2021 and 2020, the construction loans' balances due to BDC and FCC are as follows:

	Dece	mber 31, 2021	December 31, 2020
Construction loans interest, current	\$	109	\$ 918
Construction loan with BDC, non-current, fixed (2020: 4.95%) 4.45%		15,330	19,165
Construction loan with FCC, non-current, fixed 4.38%		9,778	-
Construction loan with FCC, non-current, variable 2.95%		5,438	-
	\$	30,655	\$ 20,083

In 2018, the Company completed a transaction with the Business Development Bank of Canada ("BDC") for a term loan facility ("Term Loan") of up to \$20.0 million. The purpose of the Term Loan is to assist in the financing of new equipment for the first production line built in Delta, British Columbia. The interest rate for the Term Loan was 4.95% per annum over 12 years. Principal repayments were to commence on July 1, 2021 until the Term Loan maturity date of June 1, 2033.

On June 3, 2021, the Company completed a financing transaction by increasing the existing term loan to \$45.0 million to fund the planned construction of a second production line at the Delta location. The financing was provided by Business Development Corp ("BDC"), our existing creditor, and Farm Credit Canada ("FCC") in a Pari Passu structure. Each lender will fund 50% of the \$45.0 million total loan value. The existing borrowing with BDC will increase from \$20.0 million to \$22.5 million ("BDC Amended Term Loan") and FCC will also fund the \$22.5 million ("FCC Term Loan"). Upon closing of the transaction, the Company's outstanding debt to each party, FCC and BDC, was \$10.0 million. FCC paid \$10.0 million to BDC on the Company's behalf to ensure that existing borrowings were restructured on a Pari Passu basis.

Only interest will be paid on the outstanding balance on a monthly basis prior to July 1, 2024 for both the BDC Amended Term Loan and FCC Term Loan. Principal repayments for both loans commence on July 1, 2024 and will be repaid in monthly installments until both loans mature on June 1, 2034.

The FCC Term Loan consists of a fixed term loan and a variable loan. Until maturity, the fixed term loan bears an interest rate of 4.38% and the variable loan bears an interest rate of a variable rate minus 0.75%.

The BDC Amended Term Loan bears an interest rate of 4.45% until maturity. The new terms in the BDC Amended Term Loan supersede the terms on the previous agreement.

BDC/FCC - Finance expense and interest paid

Interest is based on the outstanding loan balance and is paid monthly. Interest expense on the BDC loan was \$0.7 million during the year ended December 31, 2021 (2020: \$0.9 million). Interest expense on FCC loan was \$0.3 million and nil during the same periods. Interest expensed and interest paid during 2021 and 2020 were as follows:

	Dece	December 31, 2021		
Balance, open	\$	20,083 \$	20,084	
Additions		10,793	-	
Interest charged		938	992	
Interest paid		(937)	(993)	
Less unamortized transaction costs		(222)	-	
Balance, end	\$	30,655 \$	20,083	

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

FCC variable rate loan effective interest rate is 2.95%. The finance costs and the effective interest rate based on the average balance drawn on variable loan due to FCC were as follows:

	Decei	December 31, 2021		
Weighted average daily balance	\$	3,335 \$	n/a	
Finance costs	\$	57	n/a	
Number of days outstanding		212	n/a	
Effective interest rate	%	2.95 %	n/a	

BDC/FCC - Loss on extinguishment of debt

Management determined that the terms within the BDC Amended Term Loan and the terms within the original BDC Term Loan were substantially different, as such this debt restructuring transaction was accounted for using the extinguishment method of accounting for debt reconstruction. The loss on extinguishment of the original Term Loan with BDC was de minimis.

The Company incurred \$0.2 million in financing transaction costs in connection with the Pari Passu agreement, which were recorded as deferred financing transaction costs in the non-current period of borrowings. These transactions costs are amortized until the construction loans maturity date.

BDC/FCC - Security

The construction loans are secured by a general security agreement and a first security interest on all existing equipment and machinery plus new equipment and machinery financed with the construction loans for both BDC and FCC. Seaforth provided a guarantee for the construction loans to both BDC and FCC.

11.2 Debenture with warrants/Convertible debenture

As at December 31, 2021 and 2020 the value of the debenture with warrants/convertible debenture, which consists of principal amount due to Mill Road Capital LLC ("MRC"), net of valuation of conversion-to-shares-option, and net of valuation of warrants is as follows:

	Dec	ember 31, 2021	December 31, 2020
Principal amount due to MRC, 9%+1.5% (2020: 6.85%)	\$	15,000	\$ 15,000
Conversion of debt to shares option		-	(1,898)
Unamortized bond discount		(2,212)	-
Accrued interest		102	
Debenture with warrants/ Convertible debenture	\$	12,890	\$ 13,102

In 2016, the Company issued an unsecured subordinated convertible debenture to MRC for gross proceeds of \$15.0 million. The convertible debenture maturity date was on October 11, 2023. The Company paid financing costs of \$0.5 million in respect of issuing the convertible debenture. As at December 31, 2020 and until the debt extinguishment on July 20, 2021, the Company used the residual value method to allocate the fair value of the convertible debenture between the liability component and the derivative liability.

On July 20, 2021, Swiss Water amended the convertible debenture agreement with MRC to a debenture with warrants. Under the new terms of the agreement, the maturity date was extended by one year from October 11, 2023, to October 31, 2024. The other amended terms were: (i) the interest rate increased from a maximum of 7.85% to 9%, (ii) a 1.5% additional interest "payment in kind" was added, and (iii) the

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

debt to shares conversion feature was amended. The debt to shares conversion was amended by (a) cancelling the existing conversion feature and (b) replacing the existing conversion feature with warrants to allow MRC to purchase up to 2.25 million common shares at a price of \$3.33 per share. The warrants expire on October 31, 2024.

MRC - Finance expense and interest paid

For the year ended December 31, 2021 and 2020, interest expensed and interest paid on debt due to MRC was as follows:

	December 31, 2021	December 31, 2020
Balance, open	\$ 13,102	\$ 12,560
Interest charged for convertible debenture	840	1,569
Interest paid on convertible debenture	(510)	(1,027)
July 20, 2021 Convertible debenture	13,432	13,102
Extinguishment of liability component of convertible debt	1,568	-
	15,000	13,102
Warrants value, July 20, 2021	(2,468)	-
Interest charged for debt with warrants	1,022	-
Interest paid on debt with warrants	(664)	-
Balance, end	\$ 12,890	\$ 13,102

The debenture with warrants interest rate is 9% per annum, paid quarterly in arrears. The 9% is subject to reaching a specific covenant threshold, in excess of these, the interest rate increases to 12.5 % per annum. The Company also incurs an additional 1.5% of interest "payment in kind", which accrues quarterly and is due at the maturity date.

Prior to the amendment on July 20, 2021, the convertible debenture's interest rate was 6.85% per annum, paid quarterly in arrears. The 6.85% interest rate was subject to reaching specific covenant thresholds, in excess of these, the interest rate would have increased to 7.85% per annum. Under the terms of the agreement, Swiss Water had the option to pay interest-in-kind for the first two years. If elected, this option would have increased the principal sum by the interest owing. The Company chose not to elect to pay interest-in-kind and this option is now extinguished.

Convertible debenture - Loss on extinguishment of debt

Under IFRS 9, the accounting for the transaction to amend the agreement with MRC depends on whether the debt restructuring is considered an extinguishment or an adjustment to the existing liability ("extinguishment accounting" vs "modification accounting").

Given there is a 2.15% change in the interest rate and a replacement of the debt conversion to shares with warrants, management determined that the terms within the convertible debenture and the terms within the debenture with warrants are substantially different. As such, this debt restructuring transaction was accounted for using the extinguishment method of accounting for debt reconstruction.

Related to the extinguishment of convertible debenture on July 20, 2021, during the year ended December 31, 2021, the Company recognized a \$1.4 million loss in the 'Loss on extinguishment of Mill Road convertible debenture' on the statement of income. It consists of the liability component and the derivative liability component of the convertible debenture. There was no such loss in the year 2020. The

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

details of loss on the liability component of the convertible debenture and gain on the derivative embedded in the convertible debenture on extinguishment date are disclosed below.

	Total
Professional fees	\$ 213
Loss on extinguishment of the liability component of the convertible debenture	1,568
Gain on extinguishment of derivative embedded in the convertible debenture	(400)
Loss on extinguishment of Mill Road convertible debenture	\$ 1,381

Convertible debenture - Liability component of the convertible debenture

In 2016 the liability component of the convertible debenture was initially measured at a fair value of \$11.2 million, which represented the present value of the contractually determined stream of cash flows discounted at the prevailing market interest rate at that time applicable to instruments of comparable credit status and providing substantially the same cash flows, on the same terms, but without derivative components, of 12.15% per annum. The liability component of the convertible debenture in the amount of \$1.6 million was extinguished on July 20, 2021 and a loss of \$1.6 million was recognized in the statement of income under loss on extinguishment of convertible debenture (2020: \$nil).

Convertible debenture - Derivative financial liability component embedded in the debenture

Before the amendment to debenture with warrants on July 20, 2021 and as at December 31, 2020, under the residual value method, the derivative liabilities included the fair value of the derivative liability embedded in the convertible debenture in the amount of \$0.4 million. During the year ended December 31, 2021, this revaluation resulted in a loss of \$0.05 million being recorded in the statement of income (2020: a gain of \$1.3 million). This conversion option was extinguished on July 20, 2021 resulting in the derivative liability being written off where a gain of \$0.4 million was recognized in the statement of income under loss on extinguishment of convertible debenture (2020: \$nil).

	Dece	mber 31, 2021	De	cember 31, 2020
Balance, open	\$	352	\$	1,680
Change in fair valuation of derivative embedded option		48		(1,328)
Extinguishment of derivative embedded option		(400)		
Balance, end	\$	-	\$	352

The fair value of the derivative liability was determined using the Black-Scholes Option Pricing Model. The variables and assumptions used in computing the fair value are based on management's best estimate. The value varies with different variables of certain subjective assumptions. Inputs into the Black-Scholes Option Pricing Model to determine the fair value of the conversion option as at the date the convertible debenture was extinguished, on July 20, 2021, and as at December 31, 2020, were as follows:

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

	At extinguishment on July 20, 2021		
Share price	\$ 3.33	\$	3.06
Exercise price	\$ 8.25	\$	8.25
Option life	2.23 years		2.78 years
Volatility	51%		48%
Risk-free interest rate	0.46%		0.25%
Dividend yield	0.00%		0.00%

Convertible debenture - Conversion option in the convertible debenture

Before the amendment to debenture with warrants on July 20, 2021 and as at December 31, 2020, the convertible debenture was convertible into common shares of the Company at a conversion price of \$8.25 per common share. The convertible debenture also included a net share settlement feature that allowed Swiss Water, upon conversion, to elect to pay cash equal to the face value of the convertible debenture and to issue common shares equal to the excess value of the underlying equity above the face value of the convertible debenture. If the net share settlement option were elected, it would have resulted in fewer common shares being issued. This conversion option was extinguished on July 20, 2021.

Debenture with warrants - Liability component of debenture with warrants

On July 20, 2021, the liability component of the new debenture with warrants was initially measured at a fair value of \$12.5 million which represents the present value of the contractually determined flow of cash discounted at the prevailing market interest rate applicable to instruments of comparable credit status and providing substantially the same cash flows on the same terms, but without the warrants rights, of 16.99%.

As at July 20, 2021, the amendment date, the value of the principal amount due to MRC and the value of the warrants were as follows:

	At inception on Jul	
		20, 2021
Principal amount	\$	15,000
Warrants value		(2,468)
Liability component of debenture with warrants	\$	12,532

Debenture with warrants - Warrants component

As a part of the debenture with warrants agreement, on July 20, 2021, the Company issued 2.25 million of the Company's warrants to MRC with a value calculated using the Black Scholes model of \$2.5 million. Details on the valuation of the warrants are disclosed in the share capital note disclosure, under warrants.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

11.3 Credit Facility

As at December 31, 2021 and 2020, the Credit Facility due to a Canadian Bank is comprised of:

	De	cember 31, 2021	December 31, 2020
Credit Facility	\$	23,412	\$ 10,021
Less unamortized transaction costs		(105)	(221)
	\$	23,307	\$ 9,800

In 2019, Swiss Water entered into a revolving credit facility agreement ("Credit Facility"), with a Canadian Bank, for borrowings up to the lower of the Borrowing Base (defined below) and \$30.0 million.

The maturity date of October 18, 2022 can be extended, subject to lenders' approval. The amounts drawn on the credit facility are classified in the consolidated statement of financial position as a part of current liabilities. The Company is not required to repay any balance outstanding until maturity, as long as the outstanding balance is not in excess of the Borrowing Base.

During the year ended December 31, 2021, the Company incurred \$0.01 million (2020: \$0.05 million) in financing transaction costs in connection with the Credit Facility which were recorded as deferred financing transaction costs in the current period of loans and borrowings. These transaction costs are amortized until the Credit Facility's maturity date.

Credit Facility - Finance expense and interest paid

The Credit Facility has multiple interest rate options that are based on the Canadian Prime Rate, Base Rate, LIBO Rate, Bankers' Acceptance Rate plus an acceptance fee, in addition to an Applicable Margin for each of these rates. Fees apply to outstanding letters of credit and the unused portion of the credit. For the year ended December 31, 2021, finance expenses on the credit facility were as follows:

	Dece	mber 31, 2021	December 31, 2020
Balance, open	\$	9,800	\$ 3,182
Advances		16,500	11,600
Repayments		(3,500)	(5,300)
Fees and interest charged		391	315
Interest paid		-	(100)
Financing transaction costs		(15)	(53)
Amortized financing transaction costs		131	156
Balance, end	\$	23,307	\$ 9,800

The finance costs and the effective interest rate based on the average balance drawn were as follows:

	[December 31, 2021	December 31, 2020
Weighted average daily balance	\$	14,166	\$ 9,232
Finance costs	\$	353	\$ 253
Number of days outstanding		365	366
Effective interest rate		2.49%	2.74%

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Credit Facility - Security

The Company has pledged substantially all of its assets, except for assets pledged to BDC and FCC (see Note 11.1), as a collateral for the Credit Facility, including a first priority security interest over all inventory, accounts receivable, excess margin and gains on the commodity account, gains in the foreign exchange line of credit and other assets of the Company.

Credit Facility - Borrowing base

The Credit Facility's Borrowing Base margins eligible inventories and accounts receivable, commodity hedging account equity margin plus its market-to-market gains, which are netted against any losses in the commodity account and foreign exchange contract facility. Amounts can be drawn in either Canadian or in US\$ dollars and can be borrowed, repaid, and re-borrowed to fund operations, capital expansions, letters of credit and for general corporate purposes.

As at December 31, 2021, the Company's borrowing availability was as follows:

	Decer	mber 31, 2021	December 31, 2020
Gross borrowing base availability	\$	25,912	\$ 15,028
Advances, repayments, fees and interest from inception		(23,412)	(10,021)
Outstanding letters of credit		(300)	(300)
Interests and fees accrued		47	35
	\$	2,247	\$ 4,742

Credit Facility - Foreign exchange and commodity futures contract facilities

As part of the Credit Facility, the Company has an US\$8.0 million foreign exchange and commodity futures contract facility, which allows the Company to enter into spot, forward and other foreign exchange rate transactions and commodity futures transactions with the bank with a maximum term of up to 60 months.

11.4 Foreign exchange facility guarantee

On June 1, 2020, the Company entered into a foreign exchange facility guarantee with EDC to cover margin requirements in relation to the foreign exchange facility. On August 4, 2020, the Company's Credit Facility Lender amended the credit agreement to recognize the foreign exchange facility guarantee provided by the third party. The facility guarantees a maximum aggregate liability of up to \$6.0 million and it is valid until May 31, 2022. This guarantee provides additional borrowing capacity within the referenced credit facility.

12. INCOME TAXES

12.1 Income tax expense

For the year ended December 31, 2021, tax expense on other comprehensive income related to hedging activities was \$0.05 million (2020: \$0.5 million). Current and deferred income tax expense was as follows:

	December	r 31, 2021	December 31,	2020
Current income tax expense	\$	141	\$	-
Deferred tax expense		368	1,	,058
Total income tax expense	\$	509	\$ 1,	,058

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

12.2 Current income tax receivable and payable

As at December 31, 2021 income tax payable was \$0.2 million (2020: payable \$0.04 million).

12.3 Reconciliation

Income tax expense for the year can be reconciled to the accounting profit as follows:

	Decem	ber 31, 2021	Decei	mber 31, 2020
Statutory rate		27%		27%
Income before tax	\$	1,005	\$	4,007
Income tax calculated at applicable tax rates	\$	271	\$	1,082
Non-deductible expenses		247		(20)
Foreign tax rate differential		(9)		(4)
Income tax expense	\$	509	\$	1,058

12.4 Deferred income tax assets (liabilities)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. The movement in deferred income tax assets and liabilities during the year was as follows:

		Goodwill and	Property plant and	Financing issuance costs and		Lease	based	lia	erivatives bility and nvertible	Deb	enture with	Other compre- hensive			
	in	tangibles	equipment	other	ARO	Liability	sation	d	ebenture	w	arrants	income	Tax L	osses	Total
Balance at January 1, 2020	\$	682	\$ (11,529)	\$ 41	\$ 334	\$ 6,674	\$ 339	\$	(629)		-	\$ 237	\$	974	\$ (2,877)
To income tax expense		2	(5,180)	70	48	(358)	(139)		(122)		-	(510)	4	1,718	(1,471)
Balance at December 31, 202	0 \$	684	\$ (16,709)	\$ 111	\$ 382	\$ 6,316	\$ 200	\$	(751)		-	\$ (273)	\$ 5	5,692	\$ (4,348)
Balance at January 1, 2021	\$	684	\$ (16,709)	\$ 111	\$ 382	\$ 6,316	\$ 200	\$	(751)		_	\$ (273)	\$ 5	5,692	\$ (4,348)
To income tax expense		8	(2,165)	290	134	(454)	(46)		(496)		-	-	2	2,525	(204)
To equity		-	-	-	-	-	-		-	\$	(597)	\$ (46)		-	\$ (643)
Balance at December 31, 202	1\$	692	\$ (18,874)	\$ 401	\$ 516	\$ 5,862	\$ 154	\$	(1,247)	\$	(597)	\$ (319)	\$ 8	3,217	\$ (5,195)

During the year ended December 31, 2021, the Company recognized in the property plant and equipment and the administrative expenses a Scientific Research and Development tax credit of \$0.1 million and \$0.1 million, respectively. During the year ended December 31, 2020, the Company collected \$0.08 million related to Canadian Scientific Research and Experimental Development, a Canadian Government tax incentive program and this amount was included in the administrative expenses.

Swiss Water has \$30.4 million non-capital tax losses carry forwards as of the end of December 31, 2021, which will begin to expire in 2039. Seaforth has non-capital tax loss carry forwards of \$0.02 million, which will begin to expire in 2038.

13. OTHER LIABILITIES

Other liabilities balances represent the fair value of the deferred share units ("DSUs") and the cash-settled portion of the restricted share units ("RSUs") outstanding as follows:

	December 31, 2021	December 31, 2020
Other liabilities, current	\$ 426	\$ 632
Other liabilities, non-current	146	108
	\$ 572	\$ 740

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

14. LEASE LIABILITIES

14.1 Lease liabilities

Lease liabilities are as follows:

	December 31, 2021	December 31, 2020
Lease liabilities, current	\$ 1,793	\$ 1,688
Lease liabilities, non-current	19,926	21,729
	\$ 21,719	\$ 23,417

The Company leases the following offices, warehouses, and equipment:

- Swiss Water leases a build-to-suit production facility in Delta. The lease has an initial term of five
 years and can be renewed at the Company's option in five-year increments up to a total of 30 years.
 The lease commenced in July 2018. Under the lease, the Company has multiple options to buy-out
 the lease starting at the end of the second five-year term. The buy-out value will be equal to the fair
 market value of the property as determined by an appraisal process, subject to specified maximum
 and minimum values.
- Seaforth leases a warehouse in Delta and the lease expires in June 2027. The Company has two options to renew the lease for an additional term of five years each.
- Swiss Water leases a sales office in France which expires in October 2027.
- Swiss Water leases a facility in Burnaby that houses its decaffeination plant and offices. The lease expires in May 2023. There are no options to renew the lease.
- Swiss Water Decaffeinated Coffee Company USA, Inc. leases a sales office in Seattle, Washington, which expires in October 2022.
- Seaforth leases a truck. The lease expires in April 2023.
- Swiss Water leases various office equipment with expiring dates of October 2024 and January 2025.

14.2 Adjustments recognized on the adoption of IFRS 16

On adoption of IFRS 16, the Company recognized \$19.1 million in lease liabilities in relation to leases that had previously been classified as operating leases under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments plus anticipated exercise of renewal options that are at the discretion of the Company, discounted using the incremental borrowing rate as of January 1, 2019. The weighted average incremental borrowing rate applied to the lease liabilities at inception was 4.92%.

14.3 Amounts recognized in the statement of net income and statement of cash flows

During the year ended December 31, 2021, no finance expense (2020: \$0.4 million) related to a lease was added to construction in progress. Also, during the 2020 year a gain of \$0.01 million was recognized upon the termination of a lease. There was no such termination gain in 2021.

From the total of lease cash payments, the portion relating to finance expense is recognized in the operating activities while the principal portion of lease payments is recognized in the financing component of statement of cash flows.

Notes to the Consolidated Financial Statements

For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

	December 31, 2021	December 31, 2020
Balance, open	\$ 23,417	\$ 24,910
Additions	-	97
Remeasurement	-	(77)
Terminations	-	(5)
Finance expense	1,120	1,209
Lease cash payments	(2,818)	(2,717)
Balance, end	\$ 21,719	\$ 23,417

14.4 Minimum lease payments

As at December 31, 2021, the minimum payments under leases liabilities are as follows:

	Decen	nber 31, 2021
No later than 1 year	\$	2,827
Later than 1 year and no later than 5 years		5 <i>,</i> 858
Later than 5 years		648
	\$	9,333

15. ASSET RETIREMENT OBLIGATION (ARO)

The Company estimates the total undiscounted amount of cash flows required to settle its ARO is approximately \$2.3 million. This estimate assumes relocation from the current location upon expiry of lease in Burnaby, in 2023, at an estimated cost of \$0.9 million, and the expiry of lease in Delta, before lease renewal in 2038 at an estimated cost of \$1.4 million. As at December 31, 2021, the Company has a long-term liability ARO of \$1.9 million (2020: \$1.4 million), reflecting the present value of the ARO using risk-free rates between 0.25% and 1.75%.

	D	ecember 31, 2021	December 31, 2020
Balance, open	\$	1,415	\$ 1,343
Additions		487	-
Remeasurement		-	52
Interest accretion		9	20
Balance, end	\$	1,911	\$ 1,415

16. SHARE CAPITAL

16.1 Common shares

Swiss Water is authorized to issue an unlimited number of common shares. Each share is equally eligible to receive dividends when declared and represents one vote at meetings of shareholders. As of December 31, 2021, there were 9,129,673 common shares issued and outstanding.

16.2 Warrants

As a part of the debenture with warrants agreement with Mill Road Capital LLC, on July 20, 2021, the Company issued 2.25 million of Swiss Water's warrants to MRC. The warrant value of \$2.5 million was recorded as a component of equity as it will be settled by the exchange of a fixed amount of cash for a fixed number of the Company's common shares and will not be subsequently remeasured. Each warrant

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

is exercisable for one common share of Swiss Water at a price of \$3.33 per share, expiring on October 31, 2024. The Company incurred \$0.03 million in transaction costs related to these warrants.

	At inception on July 20, 2021
Warrant value	\$ 2,468
Warrant transaction costs	(29)
Warrant defered tax	(666)
Warrants	\$ 1,773

The fair value of warrants cannot be reliably measured, therefore, at the time of issuance the valuation was using the Black-Scholes option pricing models with assumptions as follows. As at December 31, 2021, the remaining life of the warrants is 2.84 years.

	At inception o July 20, 202
Share price	\$ 3.3
Exercise price	\$ 3.3
Option life	3.28 year
Volatility	469
Risk-free interest rate	0.389
Dividend yield	0.009

Pricing models require the input of highly subjective assumptions including the expected share price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's warrants.

16.3 Restricted share units

The Company has a restricted share unit plan ("RSU Plan") which allows it to grant RSUs to officers, employees and consultants of Swiss Water or its subsidiaries. The RSU Plan is administered by the Board of Directors, which sets the terms of incentive awards under the RSU Plan. On June 19, 2019, Swiss Water shareholders approved an increase in the number of common shares available for issuance under the 2011 Restricted Share Unit Plan as amended in June 2019. The increase is from a maximum of 333,760 common shares to a maximum of 815,509 common shares. All RSUs grants vest on the third anniversary of issuance (with certain exceptions) provided the grant recipient is still employed by Swiss Water or one of its subsidiaries as at the date of vesting. Grants are forfeited (with certain exceptions) if a recipient is no longer employed by Swiss Water or one of its subsidiaries. Upon vesting, each RSU converts to one common share. These grants allow participants to receive up to 50% of the market value of the award in cash (instead of shares) upon vesting, in order to facilitate payment of taxes owing on the awards. Any RSUs paid in cash are returned to the pool and may be re-issued, subject to the maximum number of common shares available under RSU.

Periodically, the Company grants RSU awards. Non-performance based RSUs vest over time on the third anniversary of issuance, while performance based RSUs, which also vest overtime, are subject to meeting performance objectives specified by the Board of Directors.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Each award is increased by the value of dividends paid to shareholders during the vesting period, using a formula that uses the higher of the then-current share price and \$3.20. The Company values the RSUs using the volume based weighted average share price ("VWAP"). VWAP is based on the Canadian dollar trading price of the Company's common shares on the Toronto Stock Exchange for the five trading days immediately preceding that relevant date, calculated by dividing the total value by the total volume of common shares traded, according to the RSU Plan.

During the year ended December 31, 2021 the Company issued performance based and non-performance based RSUs. The movement in RSUs for the years ended December 31, 2021 and December 31, 2020 was as follows:

	Number of RSUs	Volume based a ghted average share price	Average remaining vesting period in years	Performance based
Balance at January 1, 2020	224,836	\$ 7.07	1.40	
RSUs granted	121,140	\$ 2.95	2.15	No
RSUs issued for dividends	2,098	\$ 6.70	0.67	No
RSUs cash-settled	(23,654)	\$ 6.28	-	No
RSUs exercised	(17,570)	\$ 6.28	-	No
Balance at December 31, 2020	306,850	\$ 2.88	1.26	
Balance at January 1, 2021	306,850	\$ 2.88	1.26	
RSUs granted	87,000	\$ 3.13	2.25	No
RSUs granted - performance	158,300	\$ 3.07	2.21	Yes
RSUs cash-settled	(45,792)	\$ 3.51	-	No
RSUs exercised	(50,893)	\$ 6.07	-	No
RSUs forfeited	(15,718)	\$ 3.70	-	No
Balance at December 31, 2021	439,747	\$ 3.07	1.56	_

16.4 Deferred share units

The Company has a deferred share unit plan (the "DSU Plan") in order to issue deferred share units ("DSUs") to non-employee directors (collectively, "participants") of Swiss Water. The DSU Plan was adopted to allow participants the opportunity to defer compensation and encourage a sense of ownership in Swiss Water. Under the DSU Plan, participants may elect to defer compensation and receive DSUs equal to the value of the deferred compensation.

The first DSUs were issued in April 2012. The number of DSUs was determined by dividing the amount of deferred compensation by the Fair Market Value ("FMV"). The FMV of DSUs is defined in the DSU Plan as the weighted average closing price of Swiss Water shares for the five business days immediately preceding the relevant date.

Upon the occurrence of a redemption event, the affected participant will be entitled to receive a lump sum cash payment, net of applicable withholding taxes, equal to the product of the number of DSUs held by that participant and the FMV on the date of the redemption event. The DSUs do not contain any vesting conditions or forfeiture provisions, as they are issued in exchange for deferred compensation.

Under the DSU Plan, outstanding DSUs as at the record date are increased by the dividend whenever dividends are paid to shareholders.

The movement in DSUs for the years ended December 31, 2021, and December 31, 2020, was as follows:

Notes to the Consolidated Financial Statements

For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

		Wei	ghted average	Performance
	Number of DSUs		share price	based
Balance at January 1, 2020	126,267	\$	6.92	
DSUs issued	55,340	\$	3.33	No
DSUs redeemed	(10,289)	\$	2.99	No
Balance at December 31, 2020	171,318	\$	3.06	
Balance at January 1, 2021	171,318	\$	3.06	
DSUs issued	82,356	\$	3.06	No
DSUs redeemed	(153,813)	\$	3.17	No
Balance at December 31, 2021	99,861	\$	3.11	

17. REVENUE

17.1 Disaggregation of revenue

Revenue disaggregated by geographical markets is disclosed in the note under segment reporting. The Company also disaggregates revenue by major products and services: decaffeinated coffee sales, decaffeination services, and distribution with the following results for the years ended December 31, 2021 and 2020:

	Dec	ember 31, 2021	De	ecember 31, 2020
Decaffeinated coffee sales	\$	109,001	\$	83,417
Decaffeination services		7,547		6,862
Distribution		8,528		7,292
	\$	125,076	\$	97,571

17.2 Contract balances

As at December 31, 2021 the accounts receivable balance of \$14.1 million (2020: \$15.4 million) consists of amounts due from customer contracts and reflects the Company's right to a consideration that is unconditional. The Company did not have other contract assets or liabilities from contracts with customers.

18. EMPLOYEE BENEFITS EXPENSES

Expenses recognized for employee benefits are detailed below:

	D	ecember 31, 2021	December 31, 2020
Short-term benefits	\$	11,637	\$ 10,635
Long-term benefits		690	(129)
Post-employment benefits		1,000	1,001
	\$	13,327	\$ 11,507

Short-term benefits comprise salaries, accrued bonuses, benefits and director fees. Long-term benefits comprise share-based compensation under the RSU Plan and the DSU Plan.

Post-employment benefits are contributions to employee retirement accounts, as well as statutory remittances related to post-employment benefits. These are recognized as an expense when employees have rendered service entitling them to the contributions.

Notes to the Consolidated Financial Statements

For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

19. RELATED PARTY TRANSACTIONS

The Company's related parties include its subsidiaries, key management personnel and a company related to a director. Details of transactions between the Company and related parties (other than its subsidiaries identified in Note 1, Nature of Business) are discussed below. All intercompany transactions, balances, income and expenses are eliminated on consolidation.

19.1 Compensation of Key Management Personnel

The remuneration of directors and key management personnel during the year was as follows:

	De	cember 31, 2021	December 31, 2020
Short-term benefits	\$	2,388	\$ 2,149
Long-term benefits		571	(193)
Post-employment benefits		230	240
	\$	3,189	\$ 2,196

19.2 Trading transactions

During the year, the Company entered into the following transactions with a company that is related to a director:

	Dec	ember 31, 2021	December 31, 2020
Sales	\$	648	\$ 479
Purchases of raw materials	\$	5,344	\$ 3,891

As at December 31, 2021, the Company had the following balances receivable from and payable to a company that is related to a director:

	December 31, 2021			December 31, 2020		
Accounts receivable	\$	38	\$	40		
Accounts payable	\$	2	\$	279		

These transactions were in the normal course of operations and were measured at the fair value of the consideration or receivable, which was established and agreed to by both parties.

19.3 Employee Loans

In 2017, a subsidiary of the Company and a member of key management entered into a promissory note in the amount of US\$0.1 million. For as long as the person remained an employee, the obligation to repay the principal is forgiven against current and future awards under the RSU Plan, by forfeiture of awards. The loan was interest free other than in the event of default, in which case the promissory note would bear simple interest at a rate of 10% per annum. During 2021 the loan was settled against vested RSUs and cash payments and no amounts remain receivable as at December 31, 2021 (2020: \$0.04 million).

On October 26, 2021, the Company and a different member of key management ("borrower") entered into a promissory note in the amount of US\$0.07 million. For as long as the borrower remains an employee, the obligation to repay the principal is forgiven against current and future awards under the RSU Plan, by forfeiture of awards. The loan is interest free other than in the event of default, in which case the promissory note would bear simple interest at a rate of 10% per annum. As at December 31, 2021 the loan balance of \$0.07 million was included in other non-current receivables (2020: \$nil).

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

20. BASIC AND DILUTED EARNINGS PER SHARE ("EPS")

Basic EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding during the year. Diluted EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding, adjusted for the effects of all dilutive potential common shares. The weighted average number of shares outstanding on a diluted basis takes into account the additional shares for the assumed exercise of RSUs and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting period. When the effects of a potential issuance of shares under warrants and RSUs would be anti-dilutive, basic and diluted loss per share are the same. Basic and dilutive earnings per share are as follows:

	Dece	mber 31, 2021	Dece	ember 31, 2020
Basic earnings per share				
Net income attributable to shareholders	\$	496	\$	2,949
Weighted average number of shares		9,122,283		9,076,188
Basic earnings per share	\$	0.05	\$	0.32
Diluted earnings per share				
Net income attributable to shareholders	\$	496	\$	2,949
Interest on convertible debenture		-		1,145
Gain on fair value adjustment of embedded option		-		(1,328)
Net income after effect of diluted securities	\$	496	\$	2,766
Weighted average number of shares - basic		9,122,283		9,076,188
Effect of diluted securities: convertible debenture		-		1,818,182
Weighted average number of shares - diluted	•	9,122,283	•	10,894,370
Diluted earnings per share	\$	0.05	\$	0.25

Potential common shares are antidilutive when their conversion to common shares increases earnings per share or decreases loss per share from continuing operations. Antidilutive potential common shares are excluded from weighted average number of shares outstanding for the purposes of calculating the diluted earnings per share. The following potential common shares are antidilutive and are therefore excluded from the weighted average number of common shares outstanding for the purposes of calculating the diluted earnings per share:

	December 31, 2021	December 31, 2020
Weighted average number of RSUs granted	284,730	253,056
Weighted average number of Warrants issued	1,017,123	-

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

21. SUPPLEMENTAL CASH FLOW INFORMATION

Cash and cash equivalents comprise of cash on hand. Changes in non-cash working capital are as follows:

	De	cember 31, 2021	December 31, 2020
Accounts receivable	\$	1,239	\$ (757)
Inventories		(13,361)	(956)
Other assets and liabilities		(682)	(531)
Prepaid expenses and other receivables		(87)	(151)
Accounts payable and accrued liabilities		2,363	61
Derivative assets, liabilities and hedged firm commitments	;		
at fair value through profit and loss		(6,304)	(200)
	\$	(16,832)	\$ (2,534)

As at December 31, 2021, a \$3.3 million (2020: \$2.5 million) in additions to construction in progress was accrued in accounts payable and accrued liabilities. These are operating and investing transactions that did not require the use of the Company's cash.

In the year 2021, \$0.1 million of interest paid on construction loans was capitalized during the construction phase of new manufacturing equipment, while in the prior year 2020, \$0.6 million of interest paid on the construction loan and \$0.4 million of interest on lease liability were capitalized during the construction phase of the manufacturing equipment and the new facility in Delta, BC.

During the year ended December 31, 2021 Swiss Water capitalized \$0.5 million of asset retirement obligation, while in the year 2020 the Company capitalized \$0.05 million of asset retirement obligation and \$0.5 million depreciation of right-of use assets related to the new facility.

Cash paid to settle RSUs was \$0.2 million during the year ended December 31, 2021 (2020: \$0.1 million).

In 2021, the Company incurred \$0.2 million in financing transaction costs related to the renegotiation of the BDC and FCC construction loans, of which \$0.1 million was added to the loan balance and the remainder was paid in cash (2020: \$0.05 million).

During the year ended December 31, 2021 Swiss Water renegotiated its Mill Road Capital borrowings from convertible debenture to debenture with warrants. The Company recognized an extinguishment of debt related to the convertible debenture, of which \$1.2 million was a non cash write off of the convertible debenture bond value and the value of non cash derivative related to the conversion option. Associated with this matter, Swiss Water paid \$0.2 million in debt financing transaction costs. No cash was received for the \$2.5 million of warrants issued for debenture with warrants and financing costs to issue these warrants were \$0.03 million. There were no such transactions during the prior year ended December 31, 2020.

In the year 2021 the Company recognized in the property plant and equipment, and in the administrative expenses a Scientific Research and Development tax credit of \$0.1 million and \$0.1 million, respectively. The tax credit was a non cash transaction recognized within the financing and operating activities.

As at December 31, 2021, a total of \$0.6 million (2020: nil) of depreciation on manufacturing equipment was allocated to inventory. This is a non cash item within cash flows from operating activities.

Notes to the Consolidated Financial Statements

For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

Lease payments for a short-term lease not included in the measurement of the lease liability are classified as cash flows from operating activities. The Company has classified the principal portion of lease payments within financing activities and the interest portion within operating activities.

22. SEGMENT REPORTING

The Company's sales are primarily generated by the decaffeination of green coffee segment and in three geographic areas: Canada, the United States and other international markets. The Company's revenue from external customers and its non-current assets (excluding deferred tax assets), by location, are detailed below.

22.1 Revenue

	December 31, 2021	December 31, 2020
Canada	\$ 38,325	\$ 29,907
United States	54,050	47,664
International and other	32,701	20,000
	\$ 125,076	\$ 97,571

22.2 Non-current assets (excluding deferred tax assets)

	Dece	ember 31, 2021	D	ecember 31, 2020
Canada	\$	107,676	\$	99,651
United States		97		207
Europe		153		196
	\$	107,926	\$	100,054

23. FINANCIAL RISK MANAGEMENT

The Company's exposure to and management of financial risks related COVID-19, commodity, foreign exchange, interest rates, credit liquidity and other risks.

The Company's risk management program focuses on the unpredictability of coffee commodity prices and foreign exchange rates and seeks to minimize potential adverse effects on the Company's financial performance and cash flows. The Company uses derivative financial instruments to hedge these risk exposures. Commodity and foreign exchange risk management is carried out under the Foreign Exchange Risk management Policy and the Commodity Price risk Management Policy, both approved by the Board of Directors. In addition, the Company monitors other financial and other risks on a regular basis as discussed below.

23.1 Risks related to COVID-19

In March 2020, the World Health Organization declared a global pandemic known as COVID-19. As a result of measures taken by governments to curb the spread of COVID-19, many countries have entered into an economic recession since the second quarter of 2020. Swiss Water was deemed an essential service and continued to operate largely uninterrupted despite the pandemic with appropriate protocols in place to protect the safety and health of employees. During the early stages of the pandemic, the Company experienced strong short term volume pull from customers that service the retail grocery trade as consumers loaded their pantries in anticipation of quarantines and supply disruptions, or simply consumed their coffee at home. Also, the demand for coffee shifted between customer types. During 2021

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

the Company was affected by supply chain delays. This pandemic may continue to impact the demand for Swiss Water's products and services in the near term as well as continue to impact the supply chain. It may also impact expected credit losses on amounts due from customers and whether the entity continues to meet the criteria for hedge accounting. For example, if a hedged forecast transaction is no longer highly probable to occur, hedge accounting is discontinued.

23.2 Commodity price risk hedges

Commodity price risk hedges on purchase commitments and inventory

Commodity price risk is the risk that the fair value of inventory will fluctuate as a result of changes in commodity prices. The Company utilizes futures contracts to manage its commodity price exposure. The Company buys and sells futures contracts for coffee on the Intercontinental Exchange in order to offset its inventory position and fix the input cost of green coffee. As at December 31, 2021, the Company had futures contracts to buy 1.7 million lbs of green coffee with a notional value of US\$3.1 million, and contracts to sell 11.8 million lbs of green coffee with a notional value of US\$5.1 million. The furthest contract matures in December 2022 (2020: buy 2.5 million lbs of green coffee with a notional value of US\$3.0 million, and contracts to sell 6.6 million lbs of green coffee with a notional value of US\$7.9 million). An estimated 1% decrease in the mark-to-market rate applied to coffee futures would have resulted in an estimated gain of \$0.3 million to the net income before tax, and vice versa.

The following tables provide a summary of commodity hedges designated as hedging instruments:

Carrying amount of hedging instruments		December 31, 2021		December 31, 2020

23.3 Foreign exchange currency risk hedges

The Company realizes a significant portion of its revenues in US\$, purchases equipment in US\$, and purchases green coffee in US\$ which is, in some cases, sold to customers in Canadian dollars. The Company enters into forward foreign currency contracts to manage its exposure to currency rate fluctuations and to minimize the effect of exchange rate fluctuations on business decisions.

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

As at December 31, 2021, the Company had forward currency contracts to buy US\$8.0 million and sell US\$47.7 million (2020: buy US\$5.6 million and sell US\$51.0 million) from January 2022 through to February 2025 at various Canadian exchange rates ranging from \$1.2115 to \$1.3626. An estimated CAD 1 cent decrease in the value of US dollar would have resulted in an estimated gain of \$0.4 million to the net income and other comprehensive income before tax, and vice versa.

The following tables provide a summary of amounts related to foreign currency forward contracts designated as hedging instruments. Not included in the tables below are fair value changes for swap and other contracts, as these are not designated hedge instruments.

Currency risk hedges related to US\$ sales

As at December 31, 2021, the Company designated as hedging instruments US\$27.3 million in forward contracts to sell US dollars, which relate to highly probable forecasted sales revenue. (2020: US\$38.7 million).

23.4 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company does have interest rate risk related to its credit facilities and FCC variable loan, where a 1% increase in the Canadian prime rate loan, holding all other variables constant, would result in a \$0.3 million decrease to income before taxes. There is no interest

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

rate risk on the debenture with warrants, BDC construction loan and the FCC fixed loan as the interest rates are fixed.

23.5 Credit risk

The Company is exposed to credit risk with respect to its cash and cash equivalents, accounts receivable, and derivative financial instruments.

The Company does not have significant credit risk related to cash and cash equivalents as amounts are held with major financial institutions.

The Company follows a program of credit evaluations of customers. A customer's credit check is performed in advance of providing credit to a customer and by reviewing their external credit ratings and interviewing customers' reputable vendors and then reviewed annually.

For the year ended December 31, 2021, revenues from three major customers of \$41.4 million (2020: \$31.7 million) represented 33% (2020: 32%) of total revenues for the year. Three major customers represented 36% of total accounts receivable as at December 31, 2021 (2020: 58%).

The Company had 18% of its accounts receivable past due but not impaired as at December 31, 2021 (2020: 11%). Of the past due accounts receivable, 80% are 1-30 days past due (2020: 92%), while 23% are over 31 days past due (2020: 8%).

The Company manages the credit risk related to its derivative financial instruments by entering into such contracts only with high credit quality institutions.

23.6 Liquidity risk

Non-derivative financial liabilities are as follows:

	Car	rying Amount		Contractual Ca	sh Flows	
	Decei	mber 31, 2021	2022	2023 to 2024	2025 to 2026	Thereafter
Accounts payable	\$	8,602 \$	8,602 \$	- \$	- \$	-
Other liabilities		572	426	146	-	-
Lease liabilities		21,719	2,827	3,327	2,531	648
Credit facility		23,307	23,412	-	-	-
Construction loans and int	terest	30,655	109	1,974	7,895	20,899
Debenture with warrants		12,890	-	15,102	-	-
Total	\$	97,745 \$	35,376 \$	20,549 \$	10,426 \$	21,547

The Company has in place a planning and budgeting process to assist in determining the funds required to support the Company's normal operating requirements on an ongoing basis and its future plans. The Company ensures that there are sufficient committed financing facilities to meet its short-term business requirements, taking into account its anticipated cash flows from operations, its existing bank indebtedness and additional borrowing capacity. The Company has maintained compliance with its banking covenants and remains able to satisfy its liabilities as they become due.

23.7 Fair value of financial instruments

The Company classifies and discloses the fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

- a) Level 1 includes financial instruments where the valuation is based on quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 1 captures the Company's cash and commodity futures.
- b) Level 2 includes financial instruments where the valuation techniques are based on inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Level 2 captures the Company's foreign exchange forward contracts, derivative financial liabilities, construction loans, credit facilities and other liabilities.
- c) Level 3 includes financial instruments where the valuation techniques use inputs for the asset or liability that are not based on observable market data (unobservable inputs). The Company does not have level 3 financial instruments.

Financial instruments that are measured at fair value are categorized as follows. During the year ended December 31, 2021, there were no transfers between level 1 and 2 instruments.

	Dece	mber 31, 2021	Level 1	Level 2	Level 3
Financial assets

	\$	31,750	\$ 10	\$ 31,740	\$ -

24. COMMITMENTS

In addition to lease liabilities, the Company has the following commitments:

The Company has provided a standby letter of credit in the amount of \$0.3 million as security to the landlord.

Also, the Company has, in the normal course of business, entered into various contracts. As at December 31, 2021, these contracts related to the purchase of green coffee in the amount of \$76.4 million (2020: \$44.2 million), natural gas purchase commitments of \$nil (2020: \$0.2 million), and equipment purchase

Notes to the Consolidated Financial Statements For the Year ended December 31, 2021

(Tabular amounts are in thousands of Canadian dollars, except share and per share amounts)

commitments in the amount of \$18.4 million (2020: \$8.2 million). Of these contracts, \$94.6 million will become payable within twelve months from December 31, 2021.

25. SUBSEQUENT EVENTS

On February 21, 2022, a total of 86,306 of the outstanding RSUs vested and were converted to common shares, pursuant to the 2011 Restricted Share Unit Plan as amended on June 25, 2019. To date, 28,156 RSUs were elected to be converted to shares.

Subsequent to the year end the Company ended the lease in Seattle, Washington office.
