2. BASIS OF PREPARATION

The Company’s condensed consolidated interim financial statements for the three months ended March 31, 2024 have been prepared in accordance with International Accounting Standards 34 – Interim Financial Reporting (“IAS 34”) as issued by the International Accounting Standards Board (“IASB”). Accordingly, certain disclosures included in the annual financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the IASB have been condensed or omitted. These condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2023.

The accounting policies applied in the preparation of these condensed consolidated interim financial statements are consistent with those applied and disclosed in the Company’s audited consolidated financial statements for the year ended December 31, 2023.

These condensed consolidated interim financial statements are presented in Canadian dollars. Except for per share amounts, all amounts are expressed in thousands of Canadian dollars, unless otherwise stated. References to US\$ are to the United States dollars.

These condensed consolidated interim financial statements for the three months ended March 31, 2024, were approved for issuance by the Company’s Directors on May 7, 2024. 2.1 New and amended standards

The following amendments to accounting standards became effective for annual periods beginning on or after January 1, 2024. The adoption of these revised standards by the Company did not have a material impact on its condensed consolidated interim financial statements.

- IAS 7 *Statement of Cash Flows* and IFRS 7 *Financial instruments disclosures* contain amendments that require disclosures of the effects of supplier finance arrangements on an entity’s liabilities and cash flows, as well as liquidity risk and risk management.

(Unaudited)

- IFRS 16 *Leases* has amended guidance over accounting for lease liability in a sale and leaseback transaction.
- IAS 1 *Presentation of financial statements* was amended to clarify the classification of non-current liabilities with covenants, depending on the rights that exist at the end of the reporting period. Liabilities should be classified as non-current if a company has a substantive right to defer settlement for at least 12 months at the end of the reporting period.

2.2 New and amended standards not yet effective

These standards are effective for periods beginning after January 1, 2025, and the Company does not anticipate a material impact on its financial statements:

- IFRS 10 *Consolidated financial statements* and IAS 28 *Investments in associates and joint ventures* relate to the sale or contribution of assets between an investor and its associate or joint venture, and the amendments clarify accounting for a subsidiary when a parent company loses control of the subsidiary. IAS 28 amended equity method procedures. The amendments' effective date is not yet determined, early adoption is permitted.
- IAS 21 *The effects of changes in foreign exchange rates* was amended to specify how to determine whether a currency is exchangeable into another currency and how to determine the spot exchange rate when a currency lacks exchangeability.

3. CAPITAL MANAGEMENT

The Company's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and to sustain the future development of the business. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company considers its capital structure to include shareholders' equity and indebtedness. In order to maintain or adjust the capital structure, the Company may from time-to-time issue common shares, issue preferred shares, issue additional debt, adjust its capital spending, modify its dividend policy, and/or dispose of certain assets to manage current and projected debt levels.

4. CASH AND CASH EQUIVALENTS

Cash includes cash held with banks and financial institutions. The Company has invested \$7.7 million in thirty (30) day cashable Guaranteed Investment Certificates ("GIC") with a financial services firm, at rates between 4.65% and 5.05% (December 31, 2023: \$6.0 million).

As such, the Company transferred a total of \$57.0 million of costs from construction in progress to machinery and equipment and started depreciating over its useful life ranging between 10 and 35 years.

10.1 (i) BDC/FCC – Agreements and transaction costs

In 2018, the Company completed a transaction with BDC for a term loan facility (“Term Loan”) of up to \$20.0 million. The purpose of the Term Loan is to assist in the financing of new equipment for the first production line built in Delta, BC. The interest rate for the Term Loan was 4.95% per annum over 12 years. Principal repayments were to commence on July 1, 2021 until the Term Loan maturity date of June 1, 2033.

In 2021, the Company completed a financing transaction by increasing the existing term loan to \$45.0 million to fund the planned construction of a second production line at the Delta location. The financing was provided by BDC, the existing creditor, and FCC in a pari passu structure. Each lender will fund 50% of the \$45.0 million total loan value. The existing borrowing capacity with BDC increased from \$20.0 million to \$22.5 million (“BDC Amended Term Loan”) and FCC will also fund \$22.5 million (“FCC Term Loan”). Upon closing of the transaction, the Company’s outstanding debt to each party, FCC and BDC, was \$10.0 million each where the fixed interest rates were 4.38% and 4.45%, respectively. FCC paid \$10.0 million to BDC on the Company’s behalf to ensure that existing borrowings were restructured on a pari passu basis.

Effective November 22, 2022, as the Company continued constructing its second production line in Delta, BC, the Company entered into an amendment (the “Amended Senior Facility”) to the existing senior debt facilities with BDC and FCC. Both lenders agreed to provide the Company with up to an additional \$12.0 million, in total, of senior debt financing, at variable rates, funded equally between lenders.

Only interest will be paid on the outstanding balances monthly prior to July 1, 2024, for both the BDC and FCC Term Loans. Principal repayments for both loans commence on July 1, 2024 and will be repaid in monthly installments until both loans mature on June 1, 2034. Early principal repayment is available subject to conditions.

The FCC Term Loans consist of a fixed term and a variable loan, where, until maturity, the fixed term loan bears an interest rate of 4.38% and the variable loan bears an interest rate of the variable personal property rate minus 0.75%. The BDC Term Loans consist of a fixed term and a variable loan, where, until maturity, the fixed term loan bears an interest rate of 4.45%, while the variable loan bears an interest rate of the variable BDC floating rate minus 1.5%.

The Company incurred deferred financing costs associated with the above loans. These costs are recorded in non-current borrowings and amortized until the loan maturity date. As at March 31, 2024, deferred financing costs were \$0.5 million (December 31, 2023: \$0.5 million).

10.1 (ii) BDC/FCC – Borrowing capacity

After the amendments on November 22, 2022, the Company's borrowing capacity with BDC and FCC increased from \$45.0 million to \$57.0 million with the purpose of funding the construction of the second production line, in Delta, BC. The construction loans were fully utilized upon completion of the project in September 2023.

10.1 (iii) BDC/FCC – Finance expense and interest paid

For both lenders, interest is based on the outstanding loan balance and is paid monthly. For the three months ended March 31, 2024, interest incurred and paid on the BDC and FCC loans was \$0.8 million (2023: \$0.6 million). Of that, a total of \$0.8 million was expensed and nil was capitalized in property, plant and equipment (2023: \$0.2 million and \$0.4 million). The year to date BDC and FCC variable rate loan effective interest rates were 7.96% and 7.59% respectively (2023: 7.08% and 6.58%). The finance costs and the effective interest rates are based on the average balance drawn on each loan.

10.1 (iv) BDC/FCC – Security

The construction loans are secured by a general security agreement and a first security interest on all existing equipment and machinery plus new equipment and machinery financed with the construction loans for both BDC and FCC. Seaforth provided a guarantee for construction loans to both BDC and FCC.

10.2 Debenture with warrants with MRC

The debenture with warrants consists of the principal amount due to Mill Road Capital LLC ("MRC"), a related party, and accrued interest, net of an unamortized bond discount. As at March 31, 2024 and December 31, 2023, the debenture with warrants was as follows:

	March 31, 2024	December 31, 2023
Principal amount due to MRC, 9%+1.5%	\$ 15,000	\$ 15,000
Unamortized bond discount	(668)	(929)
Accrued interest	619	560
	\$ 14,951	\$ 14,631

10.2 (i) MRC – Agreements and transaction costs

In 2016, the Company issued an unsecured subordinated convertible debenture to MRC for gross proceeds of \$15.0 million. The convertible debenture maturity date was October 11, 2023. The Company paid financing costs of \$0.5 million in respect of issuing the convertible debenture. Until the debt

extinguishment on July 20, 2021, the Company used the residual value method to allocate the fair value of the convertible debenture between the liability component and the derivative liability.

In 2021, Swiss Water amended a convertible debenture agreement with MRC to a debenture with warrants. Under the new terms of the agreement, the maturity date was extended by one year from October 11, 2023, to October 31, 2024. The other amended terms were: (i) the interest rate increased from a maximum of 7.85% to 9%, (ii) a 1.5% additional interest “payment in kind” was added, and (iii) the debt to shares conversion feature was amended. The debt to shares conversion was amended by (a) cancelling the existing conversion feature and (b) replacing the existing conversion feature with warrants to allow MRC to purchase up to 2.25 million common shares at a price of \$3.33 per share. The warrants were to expire on October 31, 2024. This amendment was accounted for as an extinguishment of debt and a new debenture with warrants was established. The Company incurred financing costs of \$0.2 million associated with the amendment in 2021.

Effective November 22, 2022, Swiss Water amended the debenture with warrants agreement to (i) expand on the Senior Debt restricted covenant; (ii) allow Swiss Water a right to prepay the principal, and (iii) add security on the debenture. The original principal of \$15.0 million and the maturity date of October 31, 2024, remain the same. Also, the interest on the debenture remains unchanged at 9% paid quarterly plus 1.5% interest in kind accrued quarterly. Meanwhile, the warrant agreement to issue 2.25 million warrants, with an exercise price of \$3.33 was amended (i) to extend the maturity date from October 31, 2024, to April 30, 2026; and (ii) to add a cashless exercise option whereby MRC may elect to receive, upon exercise, such number of shares that is equal to the difference between the \$3.33 exercise price and the fair market value of the shares at the time of exercise. This amendment was accounted for as an extinguishment of debt and a new debenture with warrants was established. The Company incurred financing costs of \$0.2 million associated with the amendment in 2022.

10.2 (ii) MRC – Finance expense and interest paid

The debenture with warrants interest rate is 9% per annum, paid quarterly in arrears. The 9% is subject to reaching a specific covenant threshold, in excess of this, the interest rate increases to 12.5 % per annum. The Company also incurs an additional 1.5% of interest in kind, which accrues quarterly and is due at the maturity date. Interest expensed and paid for the three months ended March 31, 2024 was \$0.7 million and \$0.3 million respectively (2023: \$0.6 million and \$0.3 million).

10.2 (iii) MRC – Embedded option within the debenture with warrants

Effective November 22, 2022, the amended debenture with warrants contains an embedded option, where if MRC were to elect, it would result in fewer than the maximum of 2.25 million of common shares being issued upon the exercise of the warrants. This embedded option is a financial liability revaluated at each reporting date. As at March 31, 2024, the Company determined the fair value of the embedded option to be \$2.2 million (December 31, 2023: \$1.4 million). For the three months ended March 31, 2024, this revaluation resulted in a loss of \$0.9 million (2023: loss of \$1.0 million).

The fair value of the embedded option was determined using the Black-Scholes Option Pricing Model. The variables and assumptions used in computing the fair value are based on management’s best estimate.

10.2 (iv) MRC – Security

Effective November 22, 2022, the debenture with warrants is secured by a secondary general security agreement, after primary lenders ranking senior to MRC for the construction loans and credit facility, over all Swiss Water present and newly acquired personal property and proceeds. Prior to this, the debenture with warrants was unsecured.

10.3 Credit Facility with a Canadian Bank

As at March 31, 2024 and December 31, 2023, the Credit Facility due to a Canadian Bank comprises:

	March 31, 2024	December 31, 2023

10.3 (i) Credit Facility – Agreements and transaction costs

Effective November 22, 2022, the available credit was increased from \$30.0 million to \$45.0 million with the purpose of supporting operations and growth. In tandem, this Credit Facility lending provided additional lending of up to \$6.25 million credit facility through Export Development Canada (“EDC”), as discussed below. The maturity date of October 18, 2022, was extended to the earlier of October 19, 2025 or an event triggering default. The Company is not required to repay any balance outstanding until maturity, as long as the outstanding balance is not in excess of the Borrowing Base.

The Company incurred deferred financing costs associated with the above loan. These costs are recorded in non-current borrowings and amortized until the loan maturity date. As at March 31, 2024 deferred financing costs were \$0.1 million (December 31, 2023: \$0.1 million).

10.3 (ii) Credit Facility – Finance expense and interest paid

The Credit Facility has multiple interest rate options that are based on the Canadian Prime Rate, Base Rate, LIBO Rate, Bankers’ Acceptance Rate plus an acceptance fee, in addition to an applicable margin for each of these rates. Fees apply to outstanding letters of credit and the unused portion of the credit. The year to date Credit Facility variable rate loan effective interest rate was 7.45% (December 31, 2023: 6.94%).

10.3 (iv) Credit Facility – Borrowing base

The Credit Facility's Borrowing Base margins the Company's eligible inventories and accounts receivable, commodity hedging account equity margin plus its mark-to-market gains, which are netted against any losses in the commodity account and foreign exchange contract facility. Amounts can be drawn in either Canadian or US dollars and can be borrowed, repaid, and re-borrowed to fund operations, capital expansions, letters of credit, and for general corporate purposes.

13. SHARE CAPITAL

13.1 Common Shares

Swiss Water is authorized to issue an unlimited number of common shares without par value. Each share is equally eligible to receive dividends when declared and represents one vote at meetings of shareholders.

As at March 31, 2024, there were 9,460,552 common shares issued and outstanding (December 31, 2023: 9,212,955). As disclosed in under Restricted share units note, below, during the three months ended March 31, 2024, of the vested RSUs, a total of 247,597 RSUs were converted to 247,597 common shares (March 31, 2023: 47,140).

13.2 Preferred Shares

As at March 31, 2024, there were no preferred shares issued and outstanding (December 31, 2023: nil).

13.3 Warrants

In 2021, the Company issued 2.25 million warrants to MRC. Each warrant was exercisable for one common share at a price of \$3.33, expiring on October 31, 2024. The warrant's initial value was recorded as a component of equity and subsequently was not remeasured.

Effective November 22, 2022, the debenture with warrants agreement was amended to (i) extend the maturity date of the warrants from October 31, 2024 to April 30, 2026, and (ii) provide for a cashless exercise whereby MRC may elect to receive, upon exercise, such number of shares that is equal to the difference between the \$3.33 exercise price and the fair market value of the shares. There was no change to the number of shares issuable under the agreement or the exercise price of the warrants. As the agreement now allows for a cashless option for a variable number of shares, the warrants were reclassified from equity to financial liability. Refer to Note 10.2 for further details.

As at March 31, 2024, the 2.25 million warrants continue to be issued and outstanding with an exercise price of \$3.33, maturing on April 30, 2026. The remaining weighted average life of the warrants is 2.08 years (December 31, 2023: 2.33 years).

As at each reporting date, for RSUs that are equity settled, these RSUs are not revaluated. For the three months period ended March 31, 2024, the value of RSUs exercised was \$0.7 million, while the value of cash-settled RSUs was \$0.3 million (2023: \$0.1 million and \$0.2 million respectively). 17. BASIC AND DILUTED EARNINGS PER SHARE ("EPS")

The Company presents basic and diluted EPS for its common shares. Basic EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding during the reporting period. Diluted EPS is calculated by dividing income or loss attributable to shareholders of the Company by the weighted average number of common shares outstanding, adjusted for the effects of all dilutive potential common shares. The weighted average number of shares outstanding on a diluted basis takes into account the additional shares for the assumed exercise of RSUs and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting period. When the effects of a potential issuance of shares under warrants and RSUs would be anti-dilutive, basic and diluted loss per share are the same. Basic and dilutive earnings per share are as follows:

	3 months ended March 31, 2024	3 months ended March 31, 2023
Basic and diluted loss per share		
Net loss and diluted		
net loss attributable to shareholders	\$ (900)	\$ (701)

20. FINANCIAL RISK MANAGEMENT

The Company's risk management program focuses on the unpredictability of commodity prices and foreign exchange rates and seeks to minimize potential adverse effects on the Company's financial performance and cash flows. The Company uses derivative financial instruments to hedge these risk exposures. In addition, the Company monitors other financial risks on a regular basis.

Risk management is carried out under policies approved by the Board of Directors. The Company's exposure to and management of financial risks is discussed in more detail below.

20.1 Commodity price risk hedges on purchase commitments and inventory

Commodity price risk is the risk that the fair value of inventory will fluctuate as a result of changes in commodity prices. The Company utilizes futures contracts to manage its commodity price exposure. The Company buys and sells futures contracts for coffee on the Intercontinental Exchange in order to offset its inventory position and fix the input cost of green coffee.

As at March 31, 2024, the Company had futures contracts to buy 16.5 million pounds of green coffee with a notional value of US\$30.9 million, and contracts to sell 21.7 million pounds of green coffee with a notional value of US\$40.6 million. The furthest contract matures in March 2025 (December 31, 2023: buy 9.3 million pounds of green coffee with a notional value of US\$17.1 million, and contracts to sell 13.8 million pounds of green coffee with a notional value of US\$25.5 million). An estimated 1% decrease in the mark-to-market rate applied to coffee futures would have resulted in an estimated gain of \$0.1 million to the net loss, and vice versa (2023: \$0.1 million gain to net loss).

The following tables provide a summary of commodity hedges designated as hedging instruments:

Carrying amount of hedging instruments	March 31, 2024		December 31, 2023

20.2 Foreign exchange currency risk hedges

The Company realizes a significant portion of its sales in US\$ and purchases green coffee in US\$ which is, in some cases, sold to customers in Canadian dollars. The Company enters into forward foreign currency contracts to manage its exposure to currency rate fluctuations and to minimize the effect of exchange rate fluctuations on business decisions. These contracts relate to the Company's future net cash flows in US\$ from sales. In addition, the Company enters into forward contracts to buy US\$ for coffee that it resells in Canadian dollars.

As at March 31, 2024, the Company had forward currency contracts to buy US\$13.5 million and sell US\$45.7 million (December 31, 2023: buy US\$9.9 million and sell US\$51.3 million) from April 2024 through to January 2027 at various Canadian exchange rates ranging from \$1.28 to \$1.38. An estimated Canadian 1 cent decrease in the value of the US dollar would have resulted in an estimated gain of \$0.3 million to the net loss and other comprehensive loss, and vice versa (December 2023: \$0.3 million gain to the net loss and other comprehensive loss).

The following tables provide a summary of amounts related to foreign currency forward contracts designated as hedging instruments. Not included in the tables below are fair value changes for swap contracts, as these are not designated hedge instruments.

Currency risk hedges related to US\$ sales

As at March 31, 2024, the Company designated as hedging instruments US\$45.7 million in forward contracts to sell US dollars, which relate to highly probable forecasted sales revenue (December 31, 2023: US\$51.3 million).

20.3 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company believes that interest rate risk is low as all cash equivalents are made in fixed-rate instruments. The Company does have interest rate risk related to its credit facilities and variable construction loans, where a 1% increase in the Canadian Prime Rate loan, holding all other variables constant, would result in a \$0.3 million decrease to the net loss and vice versa (2023: \$0.4 million decrease to the net loss). There is no interest rate risk on the debenture with warrants and fixed construction loans as the interest rates are fixed.

20.4 Credit risk

The Company is exposed to credit risk with respect to its cash and cash equivalents, accounts receivable, and derivative financial instruments.

The Company does not have significant credit risk related to cash and cash equivalents as amounts are held with major financial institutions.

The Company follows a program of credit evaluations of customers. A customer's credit check is performed in advance of providing credit to a customer by reviewing their external credit ratings and interviewing customers' reputable vendors and the customer's credit check is reviewed periodically.

The Company follows a program of credit evaluations of customers and limits the amount of credit extended when deemed necessary. For the three months ended March 31, 2024, revenues from three major customers of \$18.2 million (2023: \$19.1 million) represented 47% (2023: 39%) of total revenues for the period. Three customers represented 58% of total accounts receivable as at March 31, 2024 (December 31, 2023: 42%).

The Company had 23% of its accounts receivable past due but not impaired as at March 31, 2024 (December 31, 2023: 14%). Of the accounts receivable that are past due, 83% are 1-30 days past due, while 17% are over 31 days past due (December 31, 2023: 89% and 14% respectively).

The Company manages the credit risk related to its derivative financial instruments by entering into such contracts only with high credit quality institutions.

Non-derivative financial liabilities are as follows:

The Company has in place a planning and budgeting process to assist in determining the funds required to support the Company's normal operating requirements on an ongoing basis, and its future plans. The Company ensures that there are sufficient committed financing facilities to meet its short-term business requirements, taking into account its anticipated cash flows from operations, its existing bank indebtedness, and additional borrowing capacity. The Company has maintained compliance with its banking covenants and remains able to satisfy its liabilities as they become due.

20.6 Fair value of financial instruments

The Company classifies and discloses the fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 includes financial instruments where the valuation is based on quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 1 captures the Company's cash and cash equivalents and commodity futures.
- Level 2 includes financial instruments where the valuation techniques are based on inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Level 2 captures the Company's foreign exchange forward contracts, derivative financial liabilities, borrowings embedded option, construction loans, credit facilities, and other liabilities.
- Level 3 includes financial instruments where the valuation techniques use inputs for the asset or liability that are not based on observable market data (unobservable inputs). The Company does not have level 3 financial instruments.

In addition to lease liabilities, the Company has the following commitments:
